LIST OF TABLES	4
LIST OF FIGURES	4
PREFACE	5
PART 1: CRITICAL REVIEW	7
Background	8
Methodology followed and studies selected	9
Time period, location, purpose of the studies	10
Sample size and characteristics of study subjects	13
VIA providers and their training	14
Characteristics of VIA, other screening tests used	16
Sequence of tests used for screening and diagnosis	19
Reference standard	19
Positivity results of VIA and conventional cytology	19
Accuracy of VIA	21
Detection of moderate or worse dysplasia: VIA and conventional cytology	23
Conclusions of study authors	23
Discussion and unresolved questions	23
Epilogue	25
REFERENCES	26
GLOSSARY	26
ANNEX: Studies not selected	28
PARTE 2: FULL-TEXT ARTICLES	29
Denny L, Kuhn L, Pollack A, Wainwright H, Wright T. Evaluation of alternative methods of cervical cancer screening for resource-poor settings. <i>Cancer</i> 2000; 89: 826-833.	30
University of Zimbabwe / JHPIEGO Cervical Cancer Project. Visual inspection with acetic acid for cervical-cancer screening: test qualities in a primary-care setting. <i>The Lancet</i> 1999; 353: (869-873).	39
Sankaranarayanan R, Shyamalakumary B, Wesley R, Sreedevi Amma N, Parkin DM, Krishnan Nair M. Visual inspection with acetic acid in the early detection of cervical cancer and precursors. (Letter) <i>Int J Cancer</i> 1999; 80: 161-163.	47
Sankaranarayanan R, Wesley R, Somanathan N, Dhakad N, Shyamalakumary B, Amma NS, Parkin DM, Nair MK. Visual inspection of the uterine cervix after the application of acetic acid in the detection of cervical carcinoma and its precursors. <i>Cancer</i> 1998; 83: 2150-2156.	51
Megevand E, Denny L, Dehaeck K, Soeters R, Bloch B. Acetic-acid visualization of the cervix: an alternative to cytologic screening . <i>Obstet Gynecol</i> 1996; 88: 383-386.	58
Cecchini S, Bonardi R, Mazzotta A, Grazzini G, Iossa A, Clatto S. Testing cervicography and cervicoscopy as screening tests for cervical cancer. <i>Tumori</i> 1993; 79: 22-25.	62
Slawson D, Bennett J, Herman, J. Are Papanicolaou smears enough? Acetic acid washes of the cervix as adjunctive therapy: a HARNET study. <i>J Fam Pract</i> 1992; 35: 271-277.	67
Ottaviano M, La Torre P. Examination of the cervix with the naked eye using acetic acid test . <i>Am J Obstet Gynecol</i> 1982; 143:139-142.....	75

LIST OF TABLES

1	Articles selected and time period and location of each study, by year of publication	10
2	Purpose of the studies included in this review	13
3	Sample size and selected other characteristics of the studies and the subjects	14
4	Providers of VIA and the training they received	15
5a	VIA characteristics, other screening tests used	16
5b	Criteria for positive or abnormal VIA test results	16
6	Sequence of actions in the conduct of screening and follow-up	17
7	Criteria for application of the reference standard and percent of study group tested with it	18
8	Comparison of positivity results, conventional cytology and VIA	19
9	Estimated VIA accuracy, sample size, and coverage with the reference standard... ..	20
10	Cases of CIN II or worse that were positive to either VIA or the Pap test and were negative to the other	21
11	Conclusions of the studies, as stated by the authors	22

LIST OF FIGURES

1	Percent of women with abnormal conventional cytology or abnormal VIA, by study	20
2	Sensitivity and specificity of VIA for CIN II or higher	21
