Antiretroviral prices agreed in the Caribbean negotiations (July 2002)

The prices of the antiretroviral drugs in the list below were obtained after negotiations between the Ministers of Health of the participating countries and the pharmaceutical companies that manufacture these drugs. In addition to the prices set, the list includes the names of the laboratories that participated in each of the negotiations, the products that were the object of the negotiations (with the brand name and the generic name for companies that manufacture original products, or the designation “generic” for companies that produce generics), the dose in milligrams, and the dosage form of the unit negotiated.

The prices offered by the companies will be in effect for one year from the date of the negotiations and will be applicable to all government institutions (Ministry of Health, Social Security, Armed Forces, etc.) in the countries involved. These prices do not apply to private entities, NGOs, or other country institutions outside the government. Similarly, the government can obtain even lower prices from the manufactures through its internal negotiating processes, but never higher than those negotiated since these constitute the ceiling for any government purchase in the participating countries.

Caribbean—July 2002					
LABORATORY	BRAND NAME	NAME GENERIC	DOSE MILLIGRAM (Mg)	PRESENTATION (Unit)	FINAL PRICE OFFERED IN US\$
Glaxo Smith Kline	Retrovir	Zidovudine (AZT)	300 mg	Capsule	0.80
