Web: <http://www.indetectable.org>

- Is 21 years old.
- His partner lives with HIV (they have been in a stable relationship for 4 years).
- He is enrolled in the II Semester of Humanities studies in the Javeriana University (Bogotá).
- Joined the organization *Indetectable* 3 years ago, where he has been a facilitator and workshop leader in prevention campaigns directed at young people. *Indetectable* has led a campaign directed at youth that has reached 27,000 of them in 8 cities of the country, an initiative promoted by people living with HIV or AIDS and experts, who were involved in the design, research, implementation, evaluation and other processes of this important project; Luis Augusto worked closely with this entire process and intervened in various ways.
- Thanks to his leadership and good performance, he currently manages *Indetectable's* social and youth areas.
- Luis Augusto conducts counseling sessions for family members and partners of people living with HIV or AIDS, covering social and human rights topics.
- Nationally, he is recognized for his social work in support of people living with HIV or AIDS; in recent years, he has suffered stigma and discrimination for being the partner of someone who lives with HIV, as well as for working as a committed HIV/AIDS activist in a country immersed in violence and social inequality.
- Internationally, Luis Augusto has participated in initiatives such as the Youth Advocacy Workshop organized by the Youth Coalition and Redlac as part of an ECLAC meeting in Santiago, Chile.
