

4. Present Situation and Planning for RBM (by country)

The current malaria situation and the discussion of topics deemed to be of special importance by the country delegations were presented and discussed in an open session (Symposium). This was followed by a series of satellite meetings during which specific plans of action were proposed and discussed. Their attendance was restricted to country delegations, PWR Representatives of PAHO/WHO and the Secretariat. This report summarizes the results of these sessions and presents topics discussed independently of the agenda of each meeting.
