

March 24

World  Day

**Health Care Providers
Heroes in the fight against tuberculosis**

<http://www.paho.org/>

**Pan American
Health
Organization**

*Regional Office of the
World Health Organization*

What are the warning signs of tuberculosis?

If you have a cough that lasts more than 2 weeks, regardless of your age, you may have tuberculosis, and should seek medical attention right away. The staff at your local health clinic will be willing to assist you.

Early detection of tuberculosis is important. Protect your own health and that of your loved ones.

**Curing one patient
protects the entire community**
