

Worldwide Distribution of Rubella Viruses, 1995-2005

1. Clade 2 viruses (e.g. 2c) have not been found circulating in the Western Hemisphere.
2. Some genotypes are geographically restricted (e.g. 1C, 1D).
3. Some genotypes are widely distributed (e.g. 1E, 1g).
4. Some countries/regions need more viruses isolated (e.g. Africa, Russia, Middle East, Southeast Asia, Americas).
5. Genotype 1E was first observed in 1997 and is now distributed widely.
