

**THE CHANGING NATURE OF PARTNERSHIPS AND ALLIANCES IN INTERNATIONAL
HEALTH DEVELOPMENT AND THE WORK OF PAHO**
(Comments from Mexico)

In the opinion of Mexico, this document furnishes very good information on the main actors. However, it is suggested that this section identify those that are most relevant for the Pan American Health Organization and that it indicate the specific areas in which partnerships should be established. This would be a start toward visualizing the possible contents and actors involved in the eventual partnerships and attempting to anticipate how far one can go with them.
