

CONTENTS

Preface	v
1. Introduction	1
2. Dengue and Dengue Hemorrhagic Fever	3
Historical Overview in the Americas	3
Clinical Manifestations and Diagnosis	8
Vector Distribution and Biology	15
Risk Factors for Dengue and Dengue Hemorrhagic Fever	19
Risk Factors for the Appearance of DHF/DSS	20
3. Surveillance	23
Disease Surveillance	23
Vector Surveillance	28
4. Strategies for Prevention and Control	33
The Success and Failure of the Hemispheric Eradication Program	33
Current Approaches for Surveillance and Control	34
Epidemiologic Stratification	37
5. Sustainable Prevention and Control Programs	39
Organization and Function of Control Activities	39
Vector Control Methods	49
6. Emergency Preparation and Response	59
Education of the Medical Community	60
Organization and Requirements for Medical Care	60
Case Management: Classification and Treatment of Patients	62
Emergency Vector Control	69
7. Evaluation and Prevention Control Programs	71
Epidemiologic Evaluation	71
Entomological Evaluation	73
Information Systems for <i>Aedes aegypti</i> Control Programs	73
8. Operational Research	77
9. Training in Dengue Programs	79
10. Recommendations for Dengue Programs	81
Bibliography	83

Annexes	89
Dengue Hemorrhagic Fever Record Sheet	89
Sample Dengue Case Investigation Form	90
Sample Size in <i>Aedes</i> Larval Surveys	91
Emergency Plan Guide	93
Handout for Patients with Dengue Fever	97
List of Participants at the Dengue Guidelines Meeting 16-20 December 1991, Washington, D. C.	98
