

KNOW THE RISKS

Unsafe blood, unsafe injections, and sharing drug-injection equipment can all result in

hepatitis infection.

DEMAND SAFE INJECTIONS

2 million people a year contract hepatitis from unsafe injections. Using sterile, single-use syringes

can prevent these infections.

HEBATIS

BE VACCINATED

Approximately 780 000 persons die each year from hepatitis B infection. A safe and effective vaccine can protect against hepatitis B infection for life.

GET TESTED, SEEK TREATMENT

Effective medicines exist to treat hepatitis B and cure hepatitis C.
