NOTES:

<sup>a</sup> Zika cases and congenital syndrome associated with Zika virus. Data as of 6 October 2016 2:00 PM EST.
<sup>b</sup> Incidence rate: Incident cases/100,000 population.
<sup>c</sup> Confirmed congenital syndrome associated with Zika virus infection case definition: Live newborn who meets the criteria for a suspected case of congenital syndrome associated with Zika virus infection and in whom Zika virus infection was confirmed by means of genetic analysis of placental tissue or amniocytes, or isolation of Zika virus from amniocytes.
<sup>d</sup> Population is calculated as of 1 January 2016.

### NOTES:

- Zika cases reported to the IRS International Health Regulations (2005) and national health authorities of all WHO Member States.
- Zika cases were included in the reporting of the Americas beginning on 1 June 2015.
- Zika cases were included in the reporting of the Caribbean Region beginning on 1 June 2015.
- Zika cases were included in the reporting of the Region of the Pacific beginning on 1 July 2015.
- Zika cases were included in the reporting of the African Region beginning on 1 July 2015.
- Zika cases were included in the reporting of the Eastern Mediterranean Region beginning on 1 July 2015.
- Zika cases were included in the reporting of the European Region beginning on 1 July 2015.
- Zika cases were included in the reporting of the Western Pacific Region beginning on 1 July 2015.

### Sources:

- Zika cases are reported to PAHO/WHO by Member States and other agencies in accordance with the International Health Regulations (2005). Zika cases and associated congenital syndrome cases are reported to PAHO/WHO as well as to national health authorities and to WHO Regional Contact Points in the Americas. The information is considered as of 6 October 2016.
- Incidence rates are calculated as the number of confirmed cases divided by the estimated mid-year 2016 population.
- Zika cases reported by the IHR National Focal Points to the WHO IHR Regional Contact Point for the Americas and through the Ministry of Health websites, 2016.
- Zika cases were included in the reporting of the Americas beginning on 1 June 2015. Zika cases were included in the reporting of the Caribbean Region beginning on 1 June 2015. Zika cases were included in the reporting of the Region of the Pacific beginning on 1 July 2015. Zika cases were included in the reporting of the African Region beginning on 1 July 2015. Zika cases were included in the reporting of the Eastern Mediterranean Region beginning on 1 July 2015. Zika cases were included in the reporting of the European Region beginning on 1 July 2015. Zika cases were included in the reporting of the Western Pacific Region beginning on 1 July 2015.

### Analysis:

- Zika cases are reported to PAHO/WHO by Member States and other agencies in accordance with the International Health Regulations (2005). Zika cases and associated congenital syndrome cases are reported to PAHO/WHO as well as to national health authorities and to WHO Regional Contact Points in the Americas. The information is considered as of 6 October 2016.
