and Work
Plans**

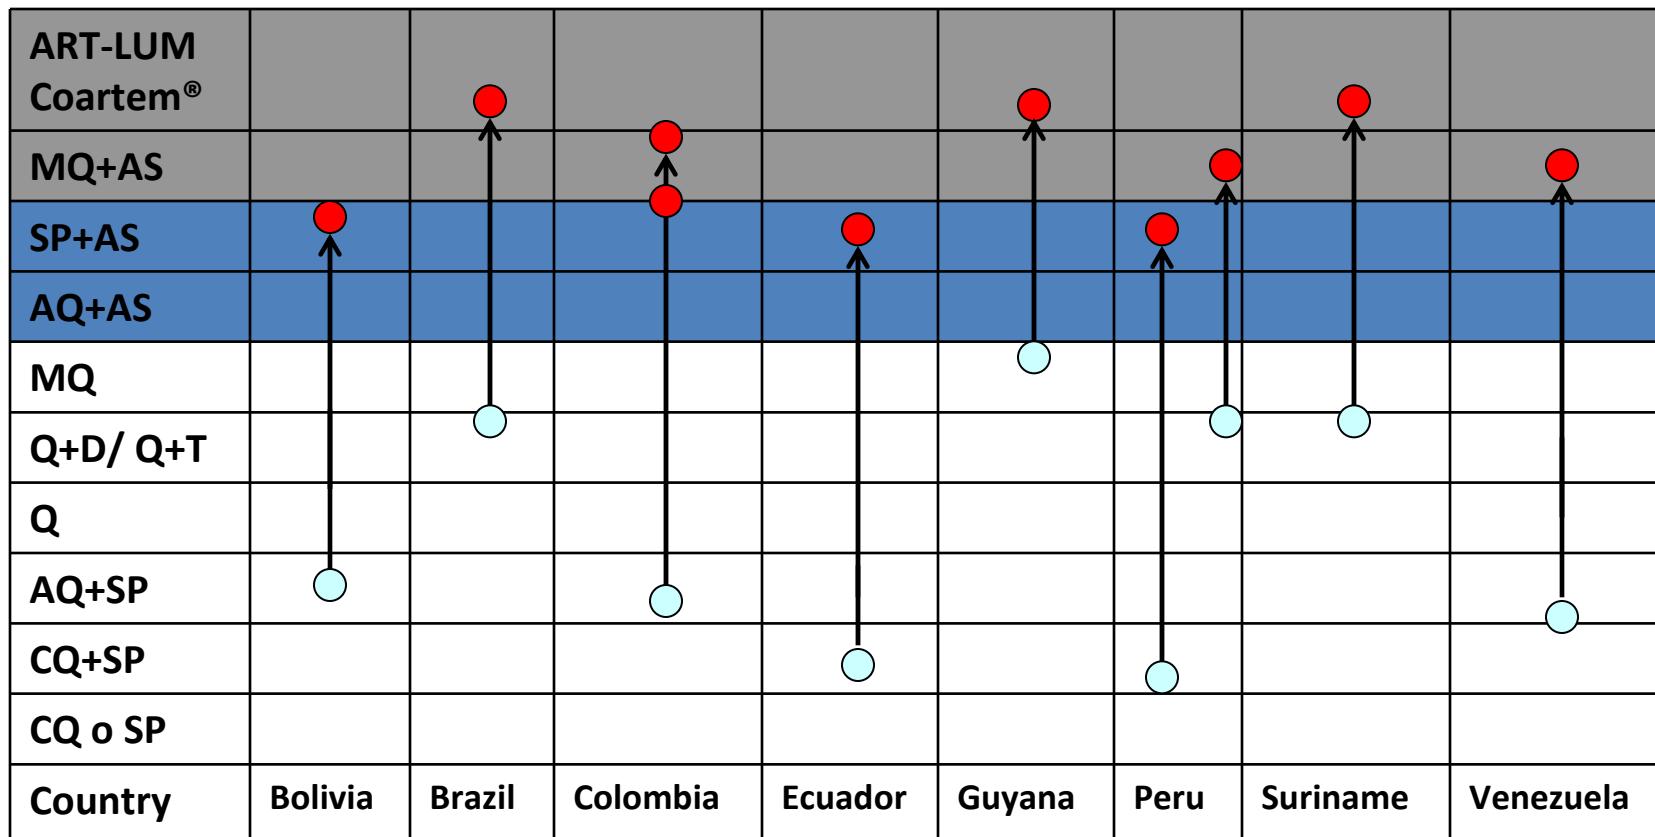

Decrease in Reported Number of Malaria Cases Since 2000

Note: Trend has already shifted downward for DOR and VEN since 2005

Policy Change for *P. falciparum* in the Amazon countries 1998-2008

● Current ● Late Nineties

ART-LUM: Artemether-Lumefantrine, AS: Artesunate AQ: Amodiaquine, CQ: Chloroquine,
D: Doxycycline, MQ: Mefloquine S/P: Sulfadoxine/Pyrimethamine, Q: Quinine, T: Tetracycline,

Some Important Products and Services

- Efficacy protocols developed / adapted based on current epidemiological situations
- Drug Quality Control approaches
- Procurement of anti-malarial drugs and commodities through PAHO Strategic Found
- Microscopy EQA; RDTs – molecular studies, deletion of HRP2
- Vector control: Use / evaluation of LLINs; Insecticide Resistance Studies
- Advocacy, communication, and information materials
- Development of orientation documents
- Approaches - different epidemiological contexts
- Technical cooperation – human resources and Institutions

The AMI/RAVREDA Added Value

- Important catalyst for the impact of malaria prevention and control efforts
- Fills important gaps of global efforts in recent years
- Sustained achievements / continuity of efforts toward RBM goals and the MDGs
- Support to regional, sub-regional, and global efforts - coordination among countries
- Contribution in laying out the foundation for successful malaria country proposals to the Global Fund
- AMI/RAVREDA efforts extended to countries in Central America
- Building blocks for malaria elimination in areas deemed feasible

“AMI-RAVREDA’s game-changing contributions in various technical and programmatic areas of work in malaria, particularly in anti-malarial drug resistance are among the best practice models that we share with the rest of the world... As we looked back where we were; analyze where we are; and reflect on what we did right and what we could have done better, our engagement with AMI-RAVREDA pictures prominently as among those that we did right and we fervently hope that we could do more of it...”

- Dr. Mirta Roses, Director, PAHO
