

## Morbidity indicators

**D.1- Low birth-weight proportion**

**D.2- Prevalence of moderate nutritional deficiency in children less than 5 years**

**D.3- Exclusive breastfeeding under 6 months of age**

**D.4- DMFT index at age 12**

**D.5- Number of confirmed cases of poliomyelitis**

**D.6- Number of confirmed cases of measles**

**D.7- Number of registered cases of diphtheria in children under age 5**

**D.8- Number of registered cases of pertussis in children under age 5**

**D.9- Number of registered cases of tetanus neonatorum**

**D.11- Number of registered cases of cholera**

**D.12- Number of registered cases of human rabies**

**D.13- Number of registered cases of yellow fever**

**D.14- Number of registered cases of plague**

**D.15- Number of registered cases of dengue**

**D.16- Number of registered cases of malaria**

**D.17- Annual parasite index**

**D.18- Tuberculosis incidence**

**D.19- Incidence of bacilloscopically positive (BK+) tuberculosis**

**D.21- AIDS incidence**

**Categories:** Total, Male, Female

**D.22- Leprosy prevalence**

**D.23- Estimated incidence of malignant neoplasms of the lung, adjusted**

**Categories:** Total, Male, Female

**D.24- Estimated incidence of malignant neoplasms of the stomach, adjusted**

**Categories:** Total, Male, Female

**D.25- Estimated incidence of malignant neoplasms of the female breast, adjusted**

**Categories:** Female

**D.26- Estimated incidence of malignant neoplasms of the cervix uteri, adjusted**

**Categories:** Female

**D.29- Prevalence of overweight among adult population**

**Categories:** Total, Male, Female

**D.30- Prevalence of tobacco consumption among adolescents**

**Categories:** Total, Male, Female

**D.31- Population at malaria risk**

**D.32- Ratio of male to female AIDS cases**
