**REGIONAL SEMINAR ON THE IMPLEMENTATION OF THE CARDIOVASCULAR RISK
REDUCTION PROJECT IN THE AMERICAS
16 TO 18 MAY 2017
SANTIAGO, CHILE**

AGENDA

Background:

The Cardiovascular Risk Reduction Project in the Americas directly responds to the NCD Plan of Action, strategic line of action three: Health Systems Response to NCDs and Risk Factors*

Purpose:

To evaluate the CVD risk reduction program to improve quality of care in health services for NCD management after a year of program implementation in a group of selected countries with special focus on challenges, opportunities and sustainability to improve the control of hypertension and extend secondary prevention through a health systems approach.

Objectives:

1. All participating countries will present on their respective country status, successes, opportunities, challenges and needs related to their own situational analysis on CVD health
2. All participating countries will showcase the current implementation and program impact of the Cardiovascular Risk Reduction Project in the Americas
3. All participants will learn from the current experiences and regional progress, successes and challenges of the Cardiovascular Risk Reduction Project in the Americas
4. All participants will increase their knowledge related to available tools and resources that have been developed to implement the Cardiovascular Risk Reduction Project in the Americas and the HEARTS Initiative
5. All participating countries will strengthen existing partnerships and expand the regional network on Cardiovascular Risk Reduction Project in the Americas

Expected Result:

1. Assessment of progress, challenges and opportunities to advance service delivery transformation in Cardiovascular Risk Reduction
2. Greater awareness of tools and resources available for Cardiovascular Risk Reduction
3. Expansion of network of Cardiovascular Risk Reduction Project in the Americas.
4. Further support of publication of implementation process for participating countries
