# EPI Newsletter 1979

## May 1979, Volume I, Number 1

- Introduction ........................................................................................................... 1
- Epidemiology ........................................................................................................ 2
- Research: Measles Vaccination ........................................................................... 2
- EPI Revolving Fund .............................................................................................. 3
- Training Activities ................................................................................................. 4
- Cold Chain ............................................................................................................ 5
- Newsbriefs ............................................................................................................ 6
- List of National Program Managers ...................................................................... 6
- National Vaccination Schedules ........................................................................... 7
- Selected Readings ............................................................................................... 8

## July 1979, Volume I, Number 2

- Country Operations: Costa Rica ........................................................................... 1
- Training Activities ................................................................................................. 2
- Epidemiology: Poliomyelitis in the Americas, 1976-1978 ..................................... 3
- EPI Revolving Fund .............................................................................................. 4
- Cold Chain ........................................................................................................... 5
- Control of Vaccine for the EPI Program ............................................................... 6
- Effects of Thawing and Freezing on Oral Polio Vaccine ...................................... 6
- Incidence of EPI Diseases in the Americas: 1978-1979 ...................................... 7
- Newsbriefs ........................................................................................................... 8

## September 1979, Volume I, Number 3

- EPI Revolving Fund .............................................................................................. 1
- Measles: An Outbreak in Panama City, 1978 ...................................................... 2
- Poliomyelitis: Honduras, 1979 ............................................................................ 3
- Measles in the Region of the Americas, 1971-1978 ............................................. 4
- Cold Chain: Refrigerators for Health Center Use ................................................. 5
- Agreement Between PAHO/Ministry of Health, Colombia/CIMDER ................. 5
- EPI Vaccines and Other Vaccines ....................................................................... 6
- Reported Cases of EPI Diseases in the Americas and the Caribbean ............... 7
- Newsbriefs ............................................................................................................ 8
- Selected Readings ............................................................................................... 8

### February 1981, Volume III, Number 1

- Local Level EPI Course: Peru ................................................................. 1
- Local Level EPI Course: Guatemala ...................................................... 2
- Local Level EPI Course: British Virgin Islands ...................................... 2
- National Cold Chain Course: Argentina .............................................. 3
- Control of Poliomyelitis in Brazil ...................................................... 3
- Measles: Costa Rica, 1979 ................................................................. 5
- Reported Cases of EPI Diseases in the Americas ............................ 7
- Argentina: Compulsory Presentation of Measles Vaccination Certificate for Admission to Primary and Pre-primary School .................. 8
- Improved Stability of EPI Vaccines: Correction ............................... 8

### April 1981, Volume III, Number 2

- Poliomyelitis: Cuba, 1962-1978 ......................................................... 1
- Measles, United States ..................................................................... 2
- Measles: Costa Rica, 1980 ............................................................ 2
- PAHO Forms for Quarterly Vaccination Reports ........................... 3
- Epidemic Outbreak of Measles in Three Central Provinces of Chile .... 4
- Accuracy of the WHO/EPI Liquid Crystal Thermometer Tape: Summary Report 5
- Kerosene for Vaccine Refrigerators in Developing Countries ............ 5
- Heat Stability of EPI Vaccines ....................................................... 6
- National Advisory Committee on Immunization (NACI): Further statement on Elimination of Indigenous Measles in Canada .................... 6
- Barbados Contribution to Capitalization of the EPI Revolving Fund ... 8
- Ecuador: Local EPI Courses ......................................................... 8

### June 1981, Volume III, Number 3

- Multidisciplinary EPI Evaluation .................................................... 1
- EPI National Program Managers’ Meeting, Quito, Ecuador, 18 to 22 May 1981 . 4
- Panama: Summary of Immunization Data from 1979 ....................... 5
- Reported Cases of EPI Diseases, 1980 and 1979, by Country .......... 7
- Regional Cold Chain Development: CIMDER ............................... 8
**August 1981, Volume III, Number 4**

- Multidisciplinary EPI Evaluation: Bolivia ............................................................... 1
- Poliomyelitis: Colombia, 1981 .............................................................................. 4
- The Thermostability of Different BCG Products ................................................... 6
- Reported Cases of EPI Diseases ........................................................................ 7
- Regional Meeting for EPI Managers from English-speaking Countries: Jamaica, 14-18 September 1981
- EPI Courses in Bolivia .......................................................................................... 8

**October 1981, Volume III, Number 5**

- Review of Poliomyelitis in the Dominican Republic.............................................. 1
- The Epidemiology of Measles in the State of Rio Grande do Sul, Brazil ............. 3
- EPI Vaccination Coverage and Reported Cases, 1980 ........................................ 5
- Retesting of Vaccines: Update to EPI Manual of Operations ................................ 6
- Rotary International Support to EPI in Bolivia and Haiti ....................................... 6
- Reported Cases of EPI Diseases ........................................................................ 7
- World Congress on Health Information Systems and the Developing Countries . 8
- Cuban Contribution to the EPI Revolving Fund.................................................... 8

**December 1981, Volume III, Number 6**

- EPI Revolving Fund Operations: 1979-1981 .......................................................... 1
- Review of Poliomyelitis in the Americas, 1971-1980 .......................................... 2
- Cold Chain Course in Mexico ............................................................................... 4
- Review of EPI Training Activities......................................................................... 4
- United States: Measles Importations from the Americas ...................................... 5
- Immunization Status of Children Entering School in Canada, 1980 .................... 6
- Reported Cases of EPI Diseases ........................................................................ 7
- Newsbriefs............................................................................................................. 8
February 1982, Volume IV, Number 1

- Measles in the Americas: 1971-1980 ................................................................. 1
- Argentina's EPI Evaluation ............................................................................. 3
- Cold Chain Course Held in Peru ................................................................. 5
- New Cold Chain Management Tool ............................................................ 5
- Cold Chain Testing Center ........................................................................... 5
- PAHO Directing Council Approves Health for All 2000 Plan of Action ...... 6
- Donations to EPI Revolving Fund ................................................................. 6
- New EPI Revolving Fund Member ............................................................... 6
- Reported Cases of EPI Diseases .................................................................. 7
- Canada: New Brunswick Passes Compulsory Immunization Law ............... 8
- Bolivia Launches EPI Newsletter ................................................................. 8
- International Measles Immunization Symposium ........................................ 8

April 1982, Volume IV, Number 2

- EPI Five-point Action Program for the 80s ..................................................... 1
- EPI Evaluation in Ecuador ............................................................................ 2
- Choosing a Refrigerator or Freezer for the EPI Cold Chain ...................... 4
- EPI Operations in Bolivia, 1981 ................................................................. 5
- Reported Cases of EPI Diseases ................................................................. 7
- Suriname Holds EPI Workshops ............................................................... 8
- Costa Rica Publishes Manual of Norms and Procedures ......................... 8

June 1982, Volume IV, Number 3

- EPI in Cuba .................................................................................................. 1
- Polio Surveillance in Jamaica ........................................................................ 4
- Polio Surveillance in Dominican Republic ................................................... 5
- Uruguay Approves Immunization Law ........................................................ 5
- Evaluation of BCG Immunization Programs ............................................. 5
- Reported Cases of EPI Diseases ................................................................. 7
- Bahamas Contributes to EPI Revolving Fund .......................................... 8
- Belize Holds EPI Workshops ..................................................................... 8

- Polio Eradication Activities in Brazil ..................................................................... 3
- Polio Incidence Rises in Brazil’s Northeast ........................................................... 4
- Rotary Supports National Vaccination Days ......................................................... 6
- Reported Cases of EPI Diseases ........................................................................... 7
## EPI Newsletter 1986

### August 1986, Volume VIII, Number 4

- Polio Update: Weeks 1-34 ................................................................. 1
- EPI Acceleration .................................................................................. 2
- Polio in Brazil's Northeast ................................................................. 3
- Why is There Measles in Panama? ...................................................... 4
- Cold Chain Refrigerator Repair Course for Caribbean ....................... 6
- Reported Cases of EPI Diseases ......................................................... 7
- Third TAG Meeting ........................................................................... 8
- Laboratory Course on Polio Diagnosis ............................................. 8

### October 1986, Volume VIII, Number 5

- Polio in the Americas: First 40 Weeks of 1986 ................................. 1
- Conclusions of the Third EPI Technical Advisory Group Meeting .... 2
- Review of 1985 Polio Cases in the US ............................................... 4
- The Epidemiology of Non-vaccination .............................................. 5
- EPI Recommends Against Routine Use of Antipyretics in Immunization Programs ......................................................... 6
- Reported Cases of EPI Diseases ......................................................... 7
- World Health Day 1987 Will Focus on Immunization ...................... 8

### December 1986, Volume VIII, Number 6

- Polio in the Americas: Weeks 1-53, 1986 ........................................ 1
- Efficacy of Infant BCG Immunization ............................................. 2
- Nosocomial Measles .......................................................................... 3
- Sudden Infant Death and DTP/IPV Immunization ............................ 5
- Cold Chain Technician's Course Held in Puerto Rico ....................... 6
- Reported Cases of EPI Diseases ....................................................... 7
- V Congress of World Federation of Public Health Associations Held in Mexico City ................................................................. 8
### February 1987, Volume IX, Number 1

- Polio in the Americas: First 12 Weeks, 1986 and 1987 ........................................ 1
- Imported Paralytic Poliomyelitis – United States, 1986 ................................. 2
- Belize Improves Immunization Coverage .......................................................... 3
- Mexico to Stage Second Polio Immunization Campaign .................................. 5
- Revolving Fund Sets Vaccine Prices, 1987 ....................................................... 5
- National Plans for EPI and Polio Addressed by ICC ................................. 6
- The Risk of Transmitting HIV Infection Through Immunization ............... 6
- Reported Cases of EPI Diseases ...................................................................... 7

### April 1987, Volume IX, Number 2

- Current Status of Poliomyelitis in the Americas .............................................. 1
- Program Communication .................................................................................. 2
- Fourth Meeting of the EPI Technical Advisory Group (TAG) on Eradication of Poliomyelitis in the Americas ................................................................. 3
- Routine Skin Preparation Before Injection: An Unnecessary Procedure ......... 6
- Reported Cases of EPI Diseases ...................................................................... 7

### June 1987, Volume IX, Number 3

- Current Status of Poliomyelitis in the Americas .............................................. 1
- Steam Sterilization in High Altitudes .............................................................. 2
- Collection, Storage and Shipping of Specimens for Poliovirus/Enterovirus Study .......................................................... 3
- Eleven Plans of Action Approved .................................................................... 4
- Outbreak of Poliomyelitis in Ecuador ............................................................. 5
- Reported Cases of EPI Diseases ...................................................................... 7
EPI Newsletter 1987

August 1987, Volume IX, Number 4

- Polio in the Americas ............................................................. 1
- First Meeting of the Southern Cone Nations on Polio Eradication .......... 2
- Sterilization Alert ................................................................. 3
- Reported Cases of EPI Diseases .......................................... 7
- Sterilization Policies in the Americas ..................................... 8

October 1987, Volume IX, Number 5

- Polio Situation in the Americas: First 40 Weeks of 1987 ................... 1
- Active Search for Polio Cases in Mexico .................................... 2
