Dogs are great friends of humans. Although, when they are angry or scared they can attack us and even bite us. Learning to live with dogs responsibly and safely helps prevent dog attacks.

Rabies is a deadly disease that dogs can transmit to people if are infected and bite us. If you are bitten by a dog in these conditions, carrying out a dog observation may save your life. Don’t disturb, mistreat or kill the animal. Dogs need to be vaccinated against rabies every year.

September 28
World Rabies Day
