ARUBA: CARDIOVASCULAR DISEASES PROFILE

DEMOGRAPHIC AND SOCIOECONOMIC PROFILE

(1) POPULATION PYRAMID (2012)

(2) Total population (2012): 107,635

(3) Percentage of population aged 30-69 years (2012): 53.8

(4) Life expectancy at birth (years) (2013):
   Total: 76.1   Male: 73.1   Female: 79.3

(5) Literate population (15+ years old) (%) (2010): 96.8

(6) Gross national income (2012):
   Current value (US$ per capita): ...
   Purchasing power parity value (international dollars): ...

ALL CAUSE PREMATURE DEATHS (2010-12)

MALE (30-69 yrs)

40% all other causes

60% NCDs

Cardiovascular diseases 32%

Diabetes mellitus 5%

Chronic respiratory diseases 2%

Cancer 2%

Total premature deaths: 458
4 NCDs premature deaths: 273

FEMALE (30-69 yrs)

24% all other causes

76% NCDs

Cardiovascular diseases 27%

Chronic respiratory diseases 9%

Cancer 44%

Total premature deaths: 267
4 NCDs premature deaths: 204

CARDIOVASCULAR DISEASES PREMATURE DEATHS (2010-12)

MALE (30-69 yrs)

146 premature deaths

17% Ischaemic heart disease

10% Hypertensive diseases

10% Heart failure

2% Other CVD

FEMALE (30-69 yrs)

72 premature deaths

15% Ischaemic heart disease

15% Hypertensive diseases

12% Heart failure

11% Other CVD

Notes: NCDs: Noncommunicable diseases; CVD: Cardiovascular diseases.

Source: PAHO/WHO Mortality information system 2014 [ICD-10: Cardiovascular diseases (I00-I99), cerebrovascular diseases (I60-I69), hypertensive diseases (I10-I15), ischaemic heart diseases (I20-I25), cancer (C00-99), diabetes (E10-14) and chronic respiratory diseases (J30-J98)].
### CARDIOVASCULAR DISEASES AGE-STANDARDIZED PREMATURE MORTALITY RATES AND TRENDS, CARIBBEAN ISLANDS (2000-2009)

Notes: a: For this analysis, Caribbean Islands include those countries with small numbers of annual cardiovascular deaths, and which required grouping together to enable trend analysis: Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Belize, Bermuda, Cayman Islands, Dominica, French Guiana, Grenada, Guadalupe, Martinique, Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Turks and Caicos, Virgin Islands (UK) and Virgin Islands (US); b: Based on the 2009 premature ASMR, an AAPC of -1.7 would be required between 2010-2025 to reach the 2025 target of a 25% reduction.

CVD: Cardiovascular diseases; Premature ASMR: Age-standardized premature mortality rate (30-69 years of age) per 100,000 pop.; AAPC: Average Annual Percentage Change; *: The AAPC is significantly different from zero at p<0.05; N.C.: Not possible to calculate (no statistically significant trend was identified over the last 5 years with available mortality data).

A complete description of the methodology used to produce this country profile is available from: [http://bit.ly/1pQtoU4](http://bit.ly/1pQtoU4).
