ANGUILLA: CARDIOVASCULAR DISEASES PROFILE

**DEMOGRAPHIC AND SOCIOECONOMIC PROFILE**

1. POPULATION PYRAMID (2012)

2. Total population (2012): 15,423

3. Percentage of population aged 30-69 years (2012): 49.1

4. Life expectancy at birth (years) (2013):
   - Total: 81.1
   - Male: 78.5
   - Female: 83.7

5. Literate population (15+ years old) (%) (2011): ...

   - Current value (US$ per capita): ...
   - Purchasing power parity value (International dollars): ...

**ALL CAUSE PREMATURE DEATHS (2010-2012)**

**MALE (30-69 yrs)**
- 42% all other causes
- 58% NCDs

**FEMALE (30-69 yrs)**
- 42% all other causes
- 58% NCDs

Total premature deaths: 45
4 NCDs premature deaths: 26

**CARDIOVASCULAR DISEASES PREMATURE DEATHS (2010-2012)**

**MALE (30-69 yrs)**
- 14 premature deaths
  - 21% Cerebrovascular disease
  - 21% Ischaemic heart disease
  - 14% Hypertensive diseases
  - 4% Other CVD

**FEMALE (30-69 yrs)**
- 7 premature deaths
  - 29% Cerebrovascular disease
  - 14% Ischaemic heart disease
  - 12% Hypertensive disease
  - 10% Other CVD

Notes: NCDs: Noncommunicable diseases; CVD: Cardiovascular diseases.
Source: PAHO/WHO Mortality information system 2014 ICD-10: Cardiovascular diseases (I00-I99), cerebrovascular diseases (I60-I69), hypertensive diseases (I10-I15), ischaemic heart diseases (I20-I25), cancer (C00-99), diabetes (E10-14) and chronic respiratory diseases (J30-98).

Notes: a: For this analysis, Caribbean Islands include those countries with small numbers of annual cardiovascular deaths, and which required grouping together to enable trend analysis: Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Belize, Bermuda, Cayman Islands, Dominica, French Guiana, Grenada, Guadalupe, Martinique, Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Turks and Caicos, Virgin Islands (UK) and Virgin Islands (US); b: Based on the 2009 premature ASMR, an AAPC of -1.7 would be required between 2010-2025 to reach the 2025 target of a 25% reduction.

CVD: Cardiovascular diseases; Premature ASMR: Age-standardized premature mortality rate (30-69 years of age) per 100,000 pop.; AAPC: Average Annual Percentage Change; *: The AAPC is significantly different from zero at p=0.05; N.C.: Not possible to calculate (no statistically significant trend was identified over the last 5 years with available mortality data).

A complete description of the methodology used to produce this country profile is available from: [http://bit.ly/1pQtoU4](http://bit.ly/1pQtoU4).

Source: PAHO/WHO Mortality information system 2014 (ICD-10: Cardiovascular diseases (I00-I99), cerebrovascular diseases (I60-I69), hypertensive diseases (I10-I15), ischaemic heart diseases (I20-I25)).
