This user's guide is prepared by the Antimicrobial Resistance (AMR) team of the Pan American Health Organization / World Health Organization (PAHO/WHO).

The development of this manual was technically coordinated by Marcelo Galas and elaborated by Jenny Hsieh, with inputs from Hatim Sati and Nienke Bruinsma (PAHO / WHO) under the general supervision of Pilar Ramón-Pardo (Advisor, Resistance to Antimicrobials) and Marcos Espinal ( Director, Communicable Diseases and Health Analysis).

Financial support for this document comes from the Federal Ministry of Health of Germany.

Last revision: 1 December 2017

## Introduction

Strengthening laboratory capacity to accurately identify pathogens and their antimicrobial susceptibility is important to build strong antimicrobial resistance (AMR) surveillance systems for containing and controlling antimicrobial resistance. This rapid assessment tool help monitor and evaluate bacteriology laboratory capacity in the Americas. It can be printed and used as a paper-based tool or used electronically by an Epi-Info™-based software program developed to facilitate data entry, storage and analysis. This user's guide includes instructions on installing Epi info™ software and the assessment tool, step-by-step data entry tutorial, data extraction tutorial and a data dictionary to refer to when performing data analysis.

## Installing Epi-Info™ software and the assessment tool

In order to use this assessment tool, you will need the following:

1. Epi Info™ 7 software
2. LabMonitorToolv1.mdb
3. LabMonitorToolv1.prj

## Installing Epi-Info™

Epi Info™ is a windows-based free software package developed by the US Centers for Disease Control and Prevention (CDC). This assessment tool is designed to operate with **Epi Info™ 7** which can be downloaded from: <https://www.cdc.gov/epiinfo/support/downloads.html>.

Please download the installation file for the latest version of Epi Info™ 7, open the file and follow screen instructions to complete the installation. For detailed instructions on how to install the software and other tutorial resources, please refer to CDC website: <https://www.cdc.gov/epiinfo/index.html>. There is also an online instructional video that is available from: <https://www.youtube.com/watch?v=FYrWiLGO7ZE>.

## Installing the rapid assessment tool files

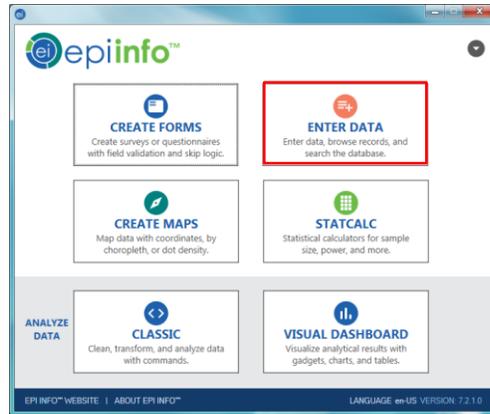

After completing the installation of Epi Info 7™, please download the **LabMonitorTool** files. It is a zip file, please unzip before opening it.

# Data entry guide

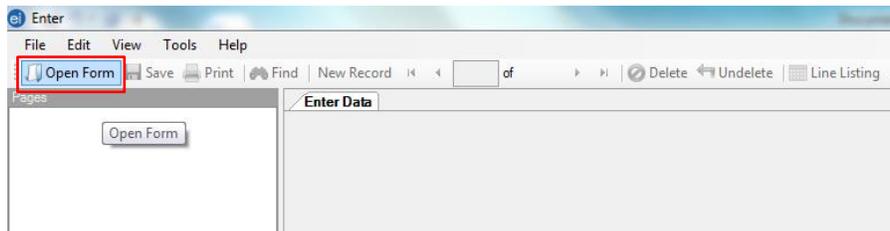

## Opening the data entry form

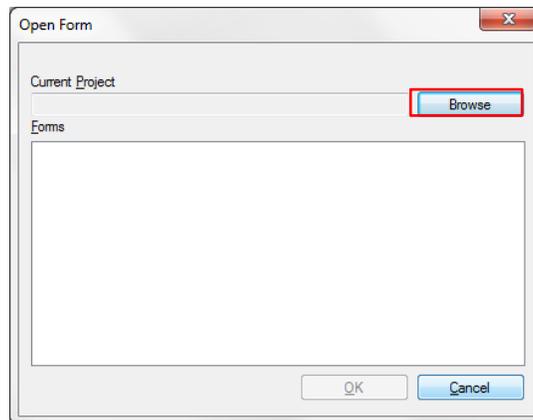

1. To launch Epi Info™ 7, click the  icon on your computer desktop or find the program from the start pop-up menu.
2. Click the **Enter Data** button. The Enter Data window will open.

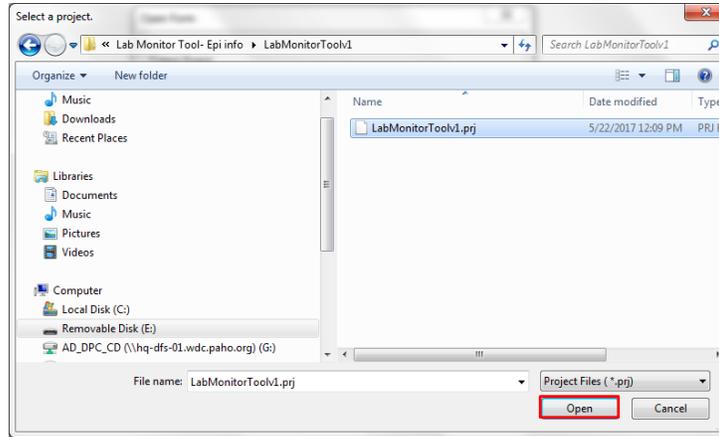

3. Open the data entry form by clicking the **Open Form** button on top right corner or by selecting **File->Open Form**.

4. Click the **Browse** button to browse for an Epi Info™ 7 project.

- From the site that you save the tool file, locate the **LabMonitorTool\_Eng\LabMonitorToolv1.prj** project directory. Select the **LabMonitorToolv. prj** and click **Open** to open it.

## Entering data

1. There are five types of variable format in this tool: Numeric, text, data, binomial, and yes/no options. For detailed descriptions of each variable, please refer to the data dictionary in this document. Please be advised that any space that is left blank or unselected will be considered and shown as **“missing data”** when extracting the database, therefore please make sure you enter all the information before data extraction. However, this does not apply to **methods checkbox** in the **analytical phase** which will be explained later in this document.
2. As an example, text boxes (e.g. Name of the institution) allows you to enter a single line of text. A drop-down list (e.g. countries) allows you to select an item from a list. The date box allows you to select a date from a pop-up calendar. Numeric boxes (e.g. N of beds) allows you to enter a number. Observation boxes allows you to enter multiline text.

Enter - [LabMonitorToolV1FormEng]

**RAPID ASSESSMENT TOOL FOR MONITORING LABORATORY CAPACITY TO DETECT ANTIMICROBIAL RESISTANCE**

Name of the institution Country Name of the lab manager Date

XXX Hospital Anguilla

--- Characteristics of the Institution ---

Nº of beds Nº of auxiliary staff

200

Observations

It is a public hospital.  
There are two students working at the lab.

3. For yes/no questions, option boxes allow you to select “Yes” or “No”.

--- Pre-Analytical Phase ---

Adequate infrastructure (physical space / lighting / separation of activities)

Yes  No

Sampling manual

Yes  No

Criteria for rejection of samples

Yes  No

Observations

Very good infrastructure.

The sampling manual is in preparation.

Page-1

[ Name CriteriaRejectOBS ] [ Type Multiline ] 38.8752470.77.1057480.10.02.32 下午 en-US 7.2.1.0 CAPS NUM

- After entering data on the first page, click **Page options** on the right to enter data on different page.

- For analytical phase, a list of methods is presented for you to select. Each method is considered as binomial variable (true or false). Please note that if any of the method is not selected, it is considered as **“False”**, in other words, this method is not performed by the laboratory. It is not considered as **“Blank”** or **“Missing data”**, therefore please make sure to check whether each method is used by the laboratory during the assessment.

## Saving data and entering a new record

1. Epi info automatically saves data as you move from page-to-page. You can also save data manually by clicking **Save** or **File->Save** after finishing entering a record.
2. To enter a new record, click **New Record** from the toolbar to open a new record.

The screenshot shows the Epi-Info LabMonitorTool/FormEng interface. The window title is "Enter - [LabMonitorTool/FormEng]". The menu bar includes File, Edit, View, Tools, and Help. The toolbar contains buttons for Open Form, Save, Print, Find, New Record, 1 of 2, Delete, Undelete, Line Listing, Dashboard, Map, Edit Form, and Help. The "New Record" button is highlighted with a red box. The main content area displays the "GUIDELINE FOR FAST AND QUALITY MONITORING OF ANTIMICROBIAL RESISTANCE SURVEILLANCE" form. The form includes fields for Name of the institution (St. John's Medical Center), Country (Antigua and Barbuda), Name of the laboratory manager (Barbara Joseph), and Date (4/18/2017). It also has sections for Characteristics of the Institution (Nº of beds: 185, Nº of professional staff: 1, Nº of technical staff, Nº of auxiliary staff: 2) and Observations.

## Finding or editing records

1. Enter a record number to find a specific record or click  to navigate to different records.

2. Please remember to manually save the record after editing, Epi-Info™ may not automatically save the edited records.
3. Click **Line Listing** to see all data that has been entered. Click **Delete** if you want to delete a record.

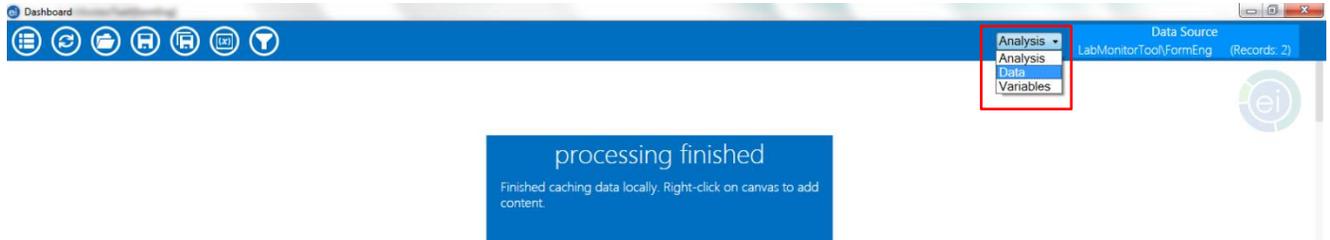

# Exporting data to MS Excel®

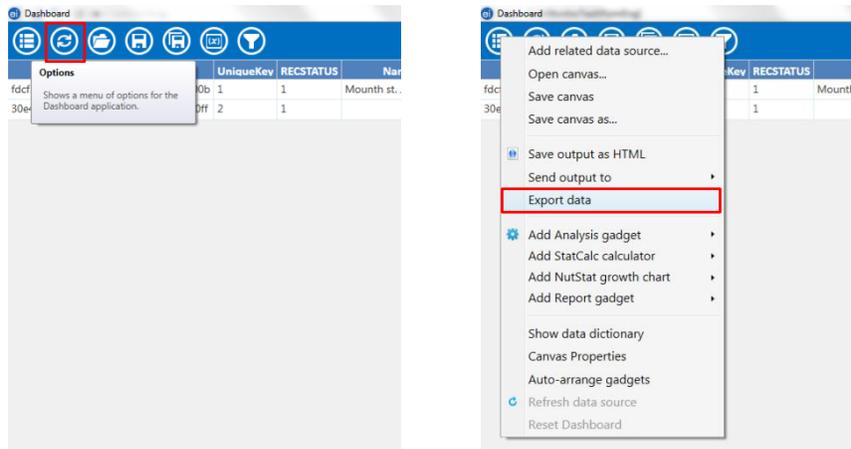

1. Click **Dashboard**

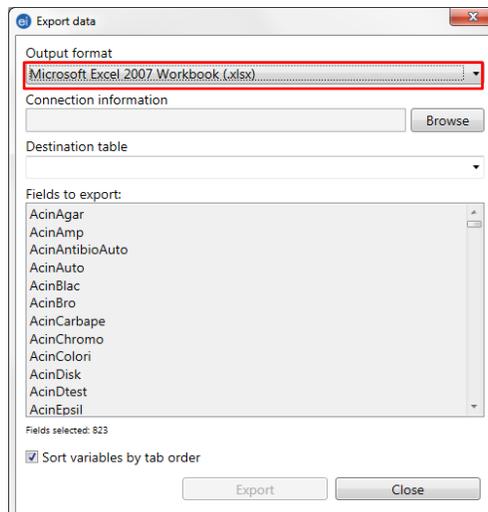

2. Select **Data** on the top right corner to see all the records entered

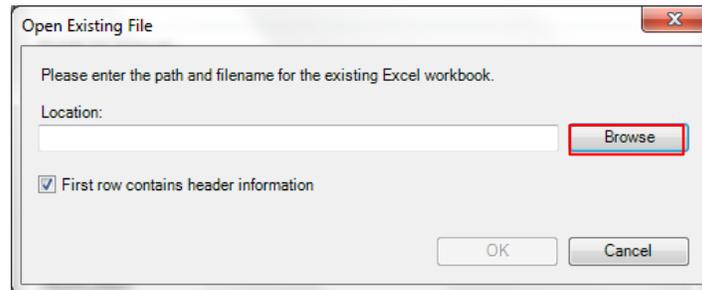

3. To export the file, click **Option -> Export data**

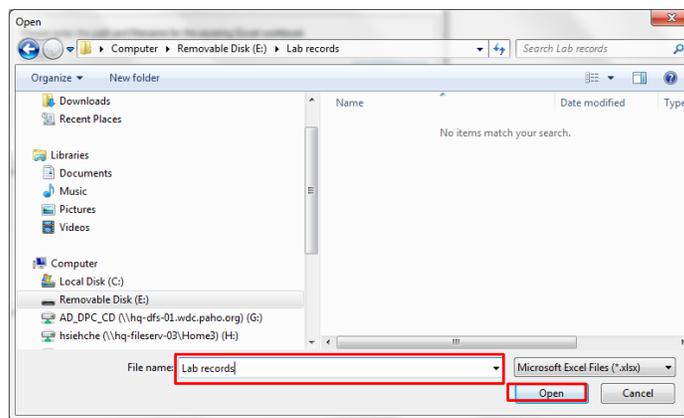

4. Select the desired **Output format** (e.g. Microsoft Excel® 2007 workbook .xlsx)

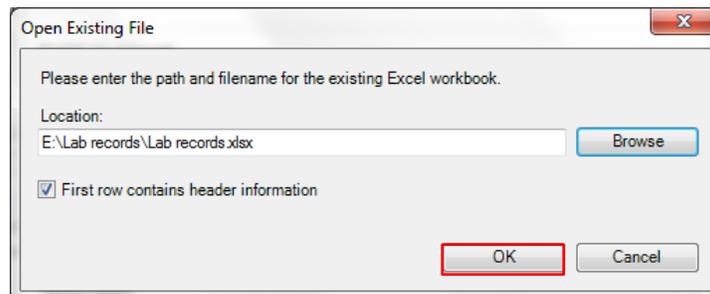

5. The **Connection information** is where you would like to save your excel file. Click **Browse** to select the location from your device.

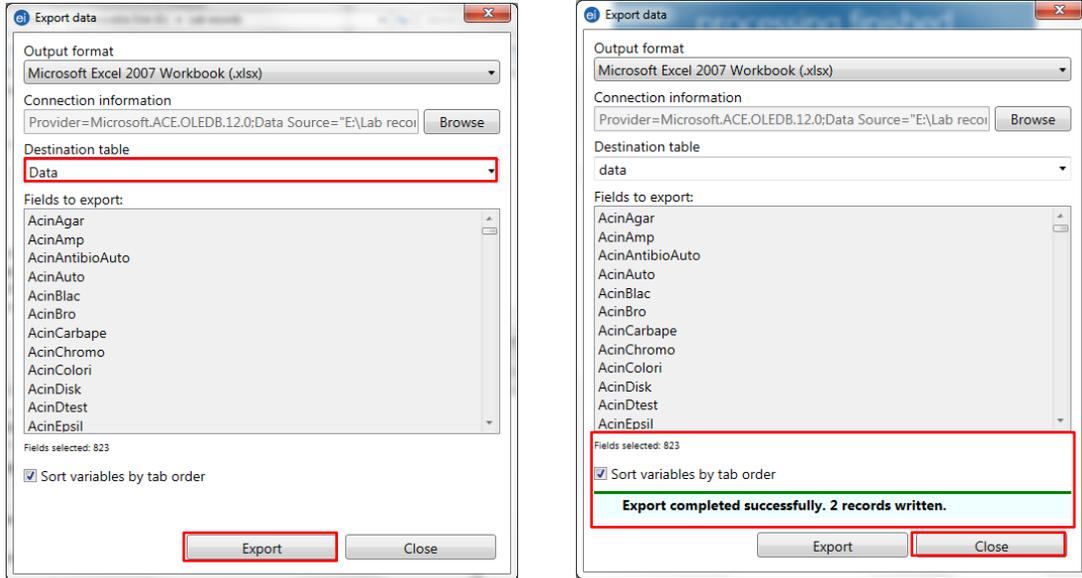

6. Name the file name and click **Open**

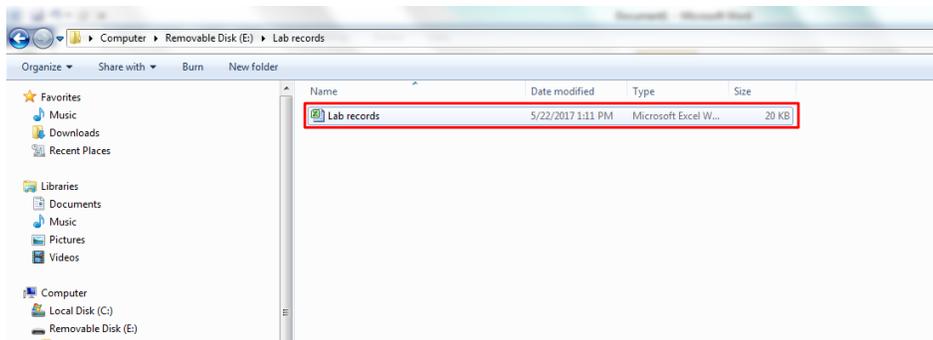

7. Click **Ok** when finishing selecting

8. The **Destination table** is the name of the excel sheet you are going to export
9. Select the variable you would like to export or click **Export** to export the all variables from epi info to your device. Export completed! Click **Close**.

10. You can now find the exported excel file at the location you chose to save!

Page 13	EpiPurpoSamYN	Availability of clinical/epidemiological data: h. purpose of sampling	Option: Number (0=Yes, 1= No)
Page 13	EpiPurpoSamOBS	Observations: Availability of clinical/epidemiological data: h. purpose of sampling	Multiline text
Page 13	EpiDiagYN	Availability of clinical/epidemiological data: i. diagnosis	Option: Number (0=Yes, 1= No)
Page 13	EpiDiagOBS	Observations: Availability of clinical/epidemiological data: i. diagnosis	Multiline text
Page 13	EpiDiseaseYN	Availability of clinical/epidemiological data: j. underlying disease(s)	Option: Number (0=Yes, 1= No)
Page 13	EpiDiseaseOBS	Observations: Availability of clinical/epidemiological data: j. underlying disease(s)	Multiline text
Page 13	EpiRiskYN	Availability of clinical/epidemiological data:k. risk factor	Option: Number (0=Yes, 1= No)
Page 13	EpiRiskOBS	Observations: Availability of clinical/epidemiological data:k. risk factor	Multiline text
Page 13	EpiDiffInfectYN	Availability of clinical/epidemiological data: l. can differentiate infection / colonization / contamination	Option: Number (0=Yes, 1= No)
Page 13	EpiDiffInfectOBS	Observations: Availability of clinical/epidemiological data: l. can differentiate infection / colonization / contamination	Multiline text

Page 13	SepComInfectYN	Can separate sample results from community acquired infections to those associated with health-care	Option: Number (0=Yes, 1= No)
Page 13	SepComInfectOBS	Observations: Can separate sample results from community acquired infections to those associated with health-care	Multiline text
Page 13	EvaluDeliveryYN	Evaluation of results before delivery	Option: Number (0=Yes, 1= No)
Page 13	EvaluDeliveryOBS	Observations: Evaluation of results before delivery	Multiline text
Page 14	RecDeliveryYN	Record of results delivery	Option: Number (0=Yes, 1= No)
Page 14	RecDeliveryOBS	Observations: Record of results delivery	Multiline text
Page 14	PeriSurvellcuYN	Periodic surveillance reports are sent to various services of the institution: a. ICU	Option: Number (0=Yes, 1= No)
Page 14	PeriSurvellcuOBS	Observations: Periodic surveillance reports are sent to various services of the institution: a. ICU	Multiline text
Page 14	PeriSurvelSurgYN	Periodic surveillance reports are sent to various services of the institution: b. surgery	Option: Number (0=Yes, 1= No)
Page 14	PeriSurvelSurgOBS	Observations: Periodic surveillance reports are sent to various services of the institution: b. surgery	Multiline text
Page 14	PeriSurvelObstYN	Periodic surveillance reports are sent to various services of the institution: c. obstetrics	Option: Number (0=Yes, 1= No)
Page 14	PeriSurvelObstOBS	Observations: Periodic surveillance reports are sent to various services of the institution: c. obstetrics	Multiline text
Page 14	PeriSurvelTrauYN	Periodic surveillance reports are sent to various services of the institution: d. traumatology	Option: Number (0=Yes, 1= No)
Page 14	PeriSurvelTrauOBS	Observations: Periodic surveillance reports are sent to various services of the institution: d. traumatology	Multiline text
Page 14	PeriSurvelOtherYN	Periodic surveillance reports are sent to various services of the institution: e. others	Option: Number (0=Yes, 1= No)
Page 14	PeriSurvelOtherOBS	Observations: Periodic surveillance reports are sent to various services of the institution: e. others	Multiline text
Page 14	Computer	Computer availability	Option: Number (0=Yes, 1= No)
Page 14	ComputerObs	Observations: Computer availability	Multiline text
Page 14	InternetConnYN	Internet connection	Option: Number (0=Yes, 1= No)
Page 14	InternetConnOBS	Observations: Internet connection	Multiline text
Page 14	ResultEQAYN	Results of external quality assurance	Option: Number (0=Yes, 1= No)
Page 14	ResultEQAOBS	Observations: Results of external quality assurance	Multiline text
Page 14	DissemResultYN	Dissemination of results: hospital, community, prevalent species and resistance profiles	Option: Number (0=Yes, 1= No)
Page 14	DissemResultOBS	Observations: Dissemination of results: hospital, community, prevalent species and resistance profiles	Multiline text
Page 14	SamReferYN	Send samples to the reference center	Option: Number (0=Yes, 1= No)
Page 14	SamReferOBS	Observations: Send samples to the reference center	Multiline text
Page 14	ReferAnsYN	Reference center answered	Option: Number (0=Yes, 1= No)
Page 14	ReferAnsOBS	Observations: Reference center answered	Multiline text
Page 14	ReferAnsTime	Reference center answered: Timing	single-line text
Page 14	DataFreqYN	Data are sent nationally	Option: Number (0=Yes, 1= No)
Page 14	DataFreqOBS	Observations: Data are sent nationally	Multiline text
Page 14	DataFreqnum	Data are sent nationally: Frequency	single-line text
Page 14	DataRegionYN	Data are sent regionally	Option: Number (0=Yes, 1= No)
Page 14	DataRegionObs	Observations: Data are sent regionally	Multiline text
Page 14	DataRegionFreq	Data are sent regionally: Frequency	single-line text
Page 14	SurveilSoftOBS	Observations: Surveillance software	Multiline text
Page 14	SurveilSoft	Surveillance software	Drop-down list: Text
Page 14	SurveilSoftWhich	If yes, specify which surveillance software	single-line text
Page 15	DiluTestYN	Perform dilution tests	Option: Number (0=Yes, 1= No)
Page 15	DiluTestMethod	Perform dilution tests: Methods	Multiline text
Page 15	DiluTestMicro	Perform dilution tests: microorganisms	Multiline text
Page 15	DiluTestOBS	Observations: Perform dilution tests	Multiline text
Page 15	MolEpiYN	Conduct molecular epidemiology (confirmation of outbreaks, dissemination of microorganisms, etc.)	Option: Number (0=Yes, 1= No)

Page 15	MolEpiMethod	Conduct molecular epidemiology: methods	Multiline text
Page 15	MolEpiMicro	Conduct molecular epidemiology: microorganisms	Multiline text
Page 15	MolEpiOBS	Observations: Conduct molecular epidemiology	Multiline text
Page 15	PersonEvaluOne	Persons that carried out the evaluation -1	single-line text
Page 15	PersonEvaluTwo	Persons that carried out the evaluation -2	single-line text
Page 15	PersonEvaluThree	Persons that carried out the evaluation -3	single-line text
Page 15	PersonEvaluFour	Persons that carried out the evaluation -4	single-line text
Page 15	GeneralComments	General comments	Multiline text
