

COVID-19

Coronavirus Disease 2019

KNOW THE FACTS:

VACCINES AND MEDICAL PRODUCTS

To date* there is no vaccine to prevent COVID-19 nor any medication with proven efficacy to treat or cure the disease.

There are ongoing investigations into potential treatments whose results will be known in the coming months. These clinical trials will show which medicines are effective.

If you are offered experimental treatment under appropriate medical supervision, it is up to you whether to accept it, in accordance with your country's laws.

Do not take any prescription medicine without medical guidance.
