

Global & Regional Update. 2 PM WDC.

2 April 2020

Global 930,867
cases

46,728
deaths

205
countries/territories/areas

HIGHLIGHTS

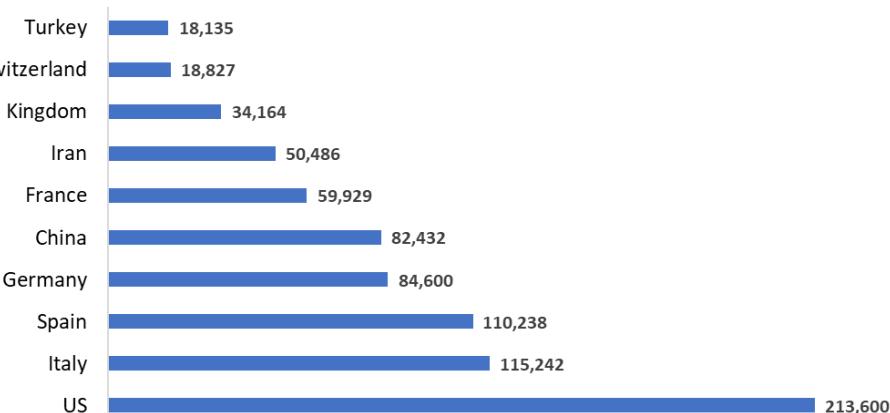

In the Region of the Americas, an additional 30,561 cases and 1,035 deaths were reported in the past 24 hours.

- The United States of America (US), which now has the highest number of cumulative totally cases in the world, continues to report majority of the cases (86%) and deaths (86%) in the region (see Table 1). In the last 24 hours, the US reported 26,298 additional cases and 947 new deaths
- The US Department of Labor published updated data on unemployment claims nationwide. The number of initial claims continued to spike, jumping from a weekly total of 3.3 million to 6.6 million
- Other countries in the region with the highest number of cases and > 10% relative increase in cases compared to the previous day during this week include Canada (10,132), Brazil (6,836), Chile (3,404) and Ecuador (3,245)
- Panama, one of the countries in the region with >1,000 cases and increasing daily cases, recently announced gender-specific rules for social distancing with men and women being allowed out on different days. On Sundays, everyone must remain indoors. The restrictions will reportedly last for at least 15 days.

In China, 0 local cases and 35 new imported cases were reported to date. Six new deaths – all in Hubei were also reported

Case numbers have now passed 100 in 35 European countries. The region now accounts for 75% of new daily cases.

- Spain has reported more than 25,000 cases in the last 3 days—second only to the United States in terms of daily incidence over that time. Spain is now reporting a total of 110,238 cases and 10,003 deaths.
- In the past 24 hours, Portugal reported a surge of cases with 1,000 new cases being reported. The UK cases surged by 27% within a 24-hour time span.

New Country

Data Updated

Note: WHO recommends using the following categories to describe transmission patterns at national and sub-national levels (wherever possible) to guide decisions for preparedness.

Category number	Category name	Definition
1	No cases	Countries/territories/areas with no cases
2	Sporadic cases	Countries/territories/areas with one or more cases, imported or locally detected
3	Clusters of cases	Countries/territories/areas experiencing cases, clustered in time, geographic location and/or by common exposures
4	Community transmission	Countries/area/territories experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: - Large numbers of cases not linkable to transmission chains - Large numbers of cases from sentinel lab surveillance - Multiple unrelated clusters in several areas of the country/territory/area
