Office for Barbados and the Eastern Caribbean Countries

COVID-19 Situation Update - 143

15 October 2021

This situation update is on the Novel Coronavirus (COVID-19) reported cases, deaths and related vaccination status, Globally, Regionally, for Barbados and the Eastern Caribbean Countries, French Territories, and the United Kingdom Overseas Territories.

Most countries of the Americas to reach COVID-19 vaccination target by end of year

Jamaica, St. Lucia, St. Vincent and the Grenadines, Haiti, Guatemala, and Nicaragua lag behind. PAHO to accelerate vaccine delivery to countries most in need of supplies.

Washington, D.C. October 12, 2021 (PAHO) - Pan American Health Organization (PAHO) Director. Carissa F. Etienne, said that while Latin America and the Caribbean is on track to reach the WHO COVID-19 vaccination target of 40% before the end of the year, six countries have yet to vaccinate 20% of their populations. The Director also introduced three possible scenarios for the future of the pandemic.

The PAHO Director highlighted that while the overall vaccination rate in Latin America and the Caribbean currently stands at 39%, "in far too many places, coverage is much lower."

"Six countries in our region have yet to reach 20% of their populations: These are Jamaica. St. Lucia. St. Vincent and the Grenadines, and Haiti in the Caribbean, and Guatemala and Nicaragua in Central America," she added.

As more vaccine doses are making their way to the region, countries must "make the necessary preparations so these

doses can be used as quickly as possible," she highlighted.

PAHO is working to accelerate vaccine deliveries to the Region, including COVAX-procured and donated doses. In the past few days, PAHO worked to fast-track the delivery of 1.3 million vaccine doses donated by Spain, Germany, the United States and Canada, which will be used to boost coverage in Honduras, Guyana, Argentina, and Jamaica. COVID-19 highlights

BARBADOS

Since September 1, 2021 there have been 60 deaths due to COVID in Barbados and 21 of them (or 1/3rd) have happened in EPI week 41.

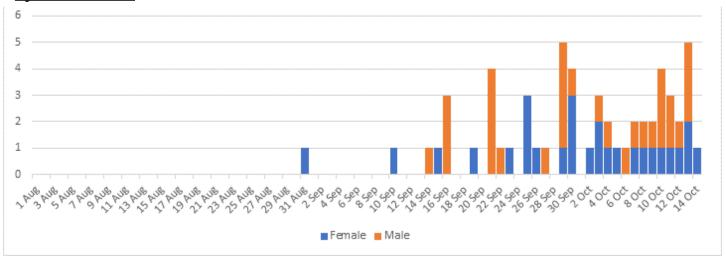

As cases have kept on rising, the increase in deaths being seen in EPI week 41, follows the lag time observed in other countries. Of the 58 people for whom vaccination was reported, 53 were unvaccinated which emphasizes the protection efficacy of vaccines.

Most deaths have occurred in those 50-69 years old and none in those younger than 30 in the last two months.

Distribution of new Covid-19 deaths for EPI week 41 by age and sex

Age group (years)	Male	Female	Total
<10	0	0	0
10-19	0	0	0
20-29	0	0	0
30-39	1	1	2
40-49	2	1	3

60-69	9	6	15
70-79	4	5	9
80-89	4	4	8
90+	3	3	6
Total	30	27	57

Reported new Covid-19 deaths in Barbados, 1 August 2021 - 14 October 2021 by sex and date

Barbados recently received 7,000 doses of Johnson & Johnson vaccines, a recent gift from the Government and people of Guyana. Individuals classified as "shut-ins" (persons confined indoors), will be prioritised to receive this single dose vaccine.

During the week, the Immunization Unit advised that first doses of the Pfizer vaccine are only being offered to students at present aged 12 to 18 until the supplies are exhausted. Persons who would have received their first dose of Pfizer already were assured that enough doses remain to administer the second dose.

Government announced the establishment of safe zones for the almost 60 percent of Barbados' population who are vaccinated. With this process unvaccinated persons would be tested weekly at the Government's expense, vaccinated persons would also be tested but less frequently.
