Introducción

1. Este documento resalta las actividades y proyectos del Plan de Inversión Capital (MCIP) que se completaron durante el biennio 2010-2011, aquellos que se proponen para el biennio 2012-2013, y aquellos que se cubren del 2014 al 2021 (el resto del plan de 10 años) que pueden ser financiados por el Fondo de Inversión Capital (MCIF) y por el PAHO Holding Account.

Plan de Inversión Capital

3. El MCIP refleja los esfuerzos crecientes del PAHO para mantener y mejorar la infraestructura, el equipo y la tecnología de información en sus instalaciones a lo largo de la Región. En un esfuerzo por mejorar la transparencia y mostrar la coordinación entre los MCIP activos y proyectos financiados por el MCIF y el Holding Account, el Bureau Sanitario Panamericano (PASB) ha incorporado referencias a actividades y proyectos del MCIF y Holding Account en este documento y en las anexos adjuntos.

These included the creation of the Emergency Operations Center/Knowledge Center and repairs to the roof of the Washington, D.C., Headquarters building. Specific descriptions of Holding Account projects are found in Document CE146/27 (2010). Details on the MCIF are outlined below.

Replenishment of the Master Capital Investment Fund for the 2012–2013 Biennium

5. In accordance with Resolution CSP27.R19 (2007), PASB’s Director is required to notify the Executive Committee of any funds transferred to the MCIF from excess income over expenditure in the Regular Program Budget. For the 2012–2013 biennium, this amount—if any—will be determined upon full closure of the financial accounts.

6. At the close of the 2010–2011 biennium (December 2011), there was a balance of US$ 2,829,685.88\(^1\) in the Information Technology Subfund, $2,534,752.23 of which is unobligated. Information Technology Services (ITS) expects to carry over the latter sum into the 2012–2013 biennium for new projects. At the close of the 2010–2011 biennium, there was a balance of $1,688,836.69 in the Real Estate and Equipment Subfund, $1,522,068.93 of which is unobligated. General Services Operations (GSO) expects to carry over the latter sum into the 2012–2013 biennium for new projects.

7. The Real Estate and Equipment Subfund will receive supplementary funding in 2012 from the World Health Organization’s Capital Master Plan (CMP), which was reactivated in the 2010–2011 biennium. To support PAHO’s efforts to mobilize funding from WHO to rebuild the earthquake-damaged PAHO/WHO Representative Office (PWR) building in Haiti, PASB’s Director of Administration funded an analysis conducted by an architectural/engineering firm to review the preliminary design and cost figures supplied by the United Nations Office for Project Services (UNOPS). Upon receipt of this study, WHO provided $850,000 in July 2012 towards the estimated $1,000,000 cost of the design and construction of a replacement building. The balance will come from PAHO funding.

Real Estate and Equipment Subfund

Projects at Headquarters in 2012–2013

8. A total of $51,900 was provided for two MCIF projects at the Headquarters building in 2010–2011 (Annex A).

\(^1\) Unless otherwise indicated, all monetary figures in this document are expressed in United States dollars (US$).
9. A solicitation for bids from vendors to rehabilitate the four elevators at the Headquarters building was issued in November 2011. The firm subsequently selected to perform the construction is preparing construction blueprints and the process of ordering materials is underway. The project should be completed by December 2013.

10. A cost proposal is under review from an architectural/engineering firm to conduct a comprehensive study of the major building systems, and a contract should be issued in spring 2012 for its execution. This information will be used to verify the existing 10-year renovation plan for the Headquarters building.

Projects in PAHO/WHO Representative Offices (PWRs) in 2012–2013

11. A total of $599,880 was provided to seven PWRs\(^2\) for projects in 2010–2011 (Annex A).

12. For the 2012–2013 biennium, the major effort will be to rebuild the PWR-Haiti office destroyed by the January 2010 earthquake. The architectural/engineering study mentioned above is part of this effort. If additional funding becomes available, there is a long-term plan to examine all PWRs to ascertain their physical condition, note any deficiencies, and develop individual 10-year plans for renovation and major maintenance.

Projects Planned for 2014–2021 for Headquarters and PWRs

13. Given the limited funds available, the proposed real estate and buildings projects planned for 2014–2021 (as well as for 2012–2013) will be reviewed by the Project Infrastructure Investment Committee, which was created by the Director in September 2009 to analyze MCIP projects from both subfunds and issue recommendations as to their feasibility and priority (Annex B). The distribution of projects approved for 2012–2013 will depend upon funding that has yet to be determined.

Information Technology Subfund

Projects at Headquarters and PWRs in 2012–2013

14. A total of $2,544,631.50 was spent in 2010–2011 on various MCIF information technology projects (Annex C), including desktop computers and peripherals, servers and hosting infrastructure, software, and information security.

15. Proposed expenditures during the 2012–2013 biennium (Annex D) will include support at both Headquarters and PWRs in the following areas:

\(^2\) Informally referred to as “country offices.”
Projects for 2014–2021

16. The projects planned for 2014–2021 (Annex C) will include:

- software licenses;
- network infrastructure;
- licenses and replacement systems for telephone systems, primarily at the country level;
- information security;
- replacement of desktops, notebooks, and peripherals, including printers and scanners where necessary; and
- hosting infrastructure required for the PASB Management Information System (PMIS).

17. Planned efforts during 2012 will focus on the deployment of virtual desktops to the Regional Office and to those PWRs where the local telecommunication infrastructure will support it. This is a shift to a server-centric computing model that emphasizes cloud computing—user access from anywhere, on any device, at any time. Consequently, investment in workstations will shift toward notebooks, replacing desktops in cases where high mobility is required, and also towards increased use of smartphones and tablets. This shift will also require robust, secure connectivity, and network infrastructure.

18. Annex C, which shows the 2012–2013 investment program, also outlines the planned program for the biennia ending in 2021. Because the currently anticipated costs from 2013 onwards are likely to be affected by the deployment of the PMIS, significant changes in the projected costs are expected from that point on. At present, all costs are estimates.
Next Steps: Proposal to Establish a Revolving Strategic Real Estate Subfund and a Vehicle Replacement Subfund as part of the Master Capital Investment Fund

19. The Organization is committed to monitoring and reassessing essential projects and their estimated costs on an ongoing basis and to regularly providing Member States with the most accurate and up-to-date information.

20. PASB recommends that the MCIF, originally approved in October 2007 by Resolution CSP27.R19, be amended to reflect the experience gained during implementation over the past several years and the changing financial conditions of the Organization. The changes proposed in this document would not apply to the Information Technology Operations Subfund created by that same resolution.

21. Following the initial 2008–2009 biennium, the Real Estate and Equipment Subfund was conceived to begin replenishment during the 2010–2011 biennium from (a) annual revenue from the rental of the Organization’s premises and land, and (b) amounts from excess revenue over and above expenditure.

22. The annual revenue that PAHO receives as rent for the grounds at 2121 Virginia Avenue in Washington, D.C. is less than what PAHO pays to rent the office space at the same location.

23. The MCIF receives a transfer of revenue from Regular Program Budget funds at the conclusion of each biennium. However, excess revenue over and above expenditure from the Regular Program Budget at the conclusion of each biennium is not a reliable source of funds.

24. Therefore, PASB proposes that the MCIF be amended to allow for the establishment of and/or changes to the following subfunds for the stated purposes:

(a) **Revolving Strategic Real Estate Subfund**: To support a long-range strategic approach towards improving PAHO’s real estate portfolio. It is recommended this subfund be established with an initial infusion of $1 million from the surplus funds that resulted from the implementation of the International Public Accounting Standards (IPSAS). In addition, PASB proposes this subfund be sustained through a revolving mechanism whereby revenues generated through the sale of PAHO-owned properties would be deposited into this subfund for future exploitation of real estate opportunities. Such opportunities could be the purchase of more appropriate facilities or the refurbishing of facilities offered by Member States for use of the Organization. Another funding mechanism of this subfund would include miscellaneous income derived from the annual cancelation of procurement loans. The projected use of the funds within this subfund would
include advancing funds for expenses required to prepare new premises, or for down payments or deposits for the purchase or leasing of facilities.

(b) **Real Estate Maintenance and Improvement Subfund:** PASB proposes to change the name of the Real Estate and Equipment Subfund to the “Real Estate Maintenance and Improvement Subfund.” Its sources of funding will remain excess revenue over and above expenditure. In addition, this subfund would be replenished by the reserve proposed by the IPSAS surplus proposal when no excess revenue over and above expenditure is generated.

(c) **MCIF Vehicle Replacement Subfund:** Under existing financial regulations, any proceeds from the sale of non-project vehicles at the Headquarters and PWR locations must be deposited into the Organization’s Miscellaneous Income and are unavailable to defray the costs of replacement vehicles. It is requested that a separate Vehicle Replacement Subfund be established under the MCIF umbrella to accept the proceeds from such sales, which then can later be disbursed by the Director of Administration to various PWRs and to Headquarters to supplement the purchase of non-project replacement vehicles.

**Action by the Pan American Sanitary Conference**

25. The Executive Committee submits the attached resolution (Annex E) to the 28th Pan American Sanitary Conference for review and adoption.

PROPOSED RESOLUTION

MASTER CAPITAL INVESTMENT FUND

THE 28th PAN AMERICAN SANITARY CONFERENCE,

Having reviewed Document CSP28/23, which reports on the activities and experiences of the Pan American Sanitary Bureau (PASB) in implementing the Master Capital Investment Plan (MCIP) funded by the Master Capital Investment Fund (MCIF), established in 2007 by Resolution CSP27.R19 of the Pan American Sanitary Conference, as well as the review on this subject by the Executive Committee;

Noting the proposal to implement changes to the funding of the MCIF Real Estate and Equipment Subfund, as defined in Resolution CSP27.R19;

Considering the proposal to create a separate subfund for the replacement of non-project vehicles,

RESOLVES:

1. To thank the Executive Committee for its review of the report on the implementation of the Master Capital Investment Fund and its subsequent recommendations.

2. To authorize a change in the name of the Real Estate and Equipment Subfund to Real Estate Maintenance and Improvement Subfund.
3. To authorize the Real Estate Maintenance and Improvement Subfund to continue funding, as authorized, from excess revenue over and above expenditure and to expand funding sources to include the surplus from the implementation of the International Public Sector Accounting Standards (IPSAS) when no revenue over and above expenditure is generated.

4. To establish a Revolving Strategic Real Estate Subfund as a long-range strategic approach towards improving PAHO’s real estate portfolio and that it be established with an initial infusion of US$ 1 million from IPSAS surplus funds.

5. To authorize future funding of the Revolving Strategic Real Estate Subfund through a revolving mechanism of accepting revenue generated from the sale of PAHO-owned properties and miscellaneous income derived from the annual cancelation of procurement loans. The authorized use of all these funds includes preparation of new premises or down payments or deposits for the purchase or leasing of facilities for use of the Organization.

6. To establish a new Vehicle Replacement Subfund based on proceeds from the sale of non-project vehicles at Headquarters and PWR locations, to be used to supplement the purchase of non-project replacement vehicles.
# Report on the Financial and Administrative Implications for the Secretariat of the Proposed Resolution

## 1. Agenda item: 5.6 Master Capital Investment Fund

## 2. Linkage to Program and Budget:

   ### (a) Strategic Objective of work:

   **Strategic Objective 16**: To develop and sustain PAHO/WHO as a flexible, learning organization, enabling it to carry out its mandate more efficiently and effectively.

   ### (b) Expected Result:

   **RER 16.6**: Physical working environment, infrastructure and employee health.

## 3. Financial Implications

   ### (a) Total estimated cost for implementation over the lifecycle of the resolution (estimated to the nearest US$ 10,000, including staff and activities):

   Vehicle Replacement Subfund: approximately 10 vehicles are sold in a year with an estimated $50,000 in sales. Proceeds were recycled into purchases of new vehicles prior to the switch to the International Public Sector Accounting Standards (IPSAS). Under IPSAS, the estimated amount went into Miscellaneous Income beginning in 2012.

   Buildings: No PAHO buildings have been sold recently and thus the recycling of the sales proceeds is difficult to estimate.

   ### (b) Estimated cost for the biennium 2012-2013 (estimated to the nearest US$ 10,000, including staff and activities):

   Using an annual estimate of $50,000 dollars from above, a biennial cost might be $100,000.

   ### (c) Of the estimated cost noted in (b), what can be subsumed under existing programmed activities?

   None.
4. Administrative Implications

(a) Indicate the levels of the Organization at which the work will be undertaken:
This work will continue to reside in the administrative areas at the PWR and Headquarters level.

(b) Additional staffing requirements (indicate additional required staff full-time equivalents, noting necessary skills profile):
This work should be accomplished within the existing staffing levels.

(c) Time frames (indicate broad time frames for the implementation and evaluation):
After the 2012–2013 biennium, the replenishment mechanism will be reviewed.
## ANALYTICAL FORM TO LINK AGENDA ITEM WITH ORGANIZATIONAL MANDATES

1. **Agenda item:** 5.6 Master Capital Investment Fund

2. **Responsible unit:** General Services Operations (GSO)

3. **Preparing officer:** Edward Harkness, Manager, General Services Operations

4. **List of collaborating centers and national institutions linked to this Agenda item:**
   - None

5. **Link between Agenda item and Health Agenda for the Americas 2008-2017:**
   - None

6. **Link between Agenda item and Strategic Plan 2008-2012:**
   - *Strategic Objective 16:* To develop and sustain PAHO/WHO as a flexible, learning organization, enabling it to carry out its mandate more efficiently and effectively.

7. **Best practices in this area and examples from countries within the Region of the Americas:**
   - Maintenance of buildings with efforts to repair equipment prior to failure such as air conditioning units or repair damaged areas such as roofs, walls, pipes, floors and other structural areas prevents higher expenditures if these vulnerabilities are ignored and left untouched. Renovations of spaces will enhance the operating efficiency for PAHO staff members to deliver technical cooperation.

8. **Financial implications of this Agenda item:**
   - Unneeded or catastrophic losses to real property will be avoided by advance maintenance and repairs. Safe and sound buildings protect staff members.
