

TAKE THE CHALLENGE END AIDS

December 1, 2016 **World AIDS Day**

PAHO

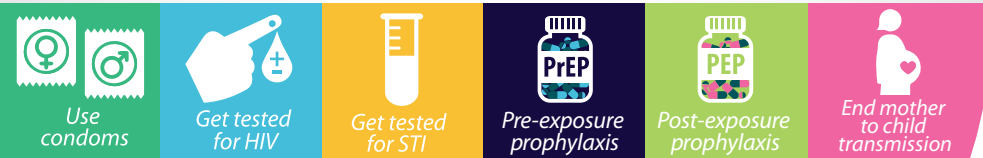

WHO

PREVENT HIV

Health services should offer multiple options to prevent HIV, including:

- ✓ Female and male condoms
- ✓ Lubricants
- ✓ HIV testing
- ✓ Testing and treatment for sexually transmitted infections
- ✓ Harm reduction programs and needle exchange
- ✓ Pre-exposure prophylaxis (PrEP) and post-exposure prophylaxis (PEP)

**1 IN 3 PEOPLE
WITH HIV** in
Latin America
and the
Caribbean
**DON'T KNOW
THEY HAVE IT**

HIV testing should be available in medical services and also in places frequently visited by key population groups.

GETTING TESTED

for HIV is fast
and easy

Find out where you can get tested.

Knowing if you have HIV is the
first step to a long and healthy life.

December 1, 2016 **World AIDS Day**

Provide **TREATMENT** **FOR ALL**

Almost half of all people living with HIV in Latin America and the Caribbean are still without treatment. Offering antiretroviral therapy as soon as HIV is diagnosed can keep people alive and healthy and reduces transmission.

PAHO

WHO

**NEVER
STOP**
taking your
medication

Starting treatment as soon as you find out you have HIV and taking your medication correctly ensures good health and reduces the risk of transmission.

HIV Treatment can be as simple as taking a single pill per day.

STOP DISCRIMINATION in health services

Good health is everyone's right. Stigma and discrimination prevent people with HIV from accessing health services.

WHO

INCREASE FINANCING,

improve
efficiency

A world without HIV will require more financing, better focus, and more efficient programs and services.
