Tasa de notificación de casos sospechosos de sarampión y rubéola en las Américas comparando el mismo periodo* en 2015 y 2016

Queremos llamar su atención a los datos que observamos en esta gráfica, donde comparamos dos periodos epidemiológicos para todos los países (semanas epidemiológicas 1-14 2015 y 2016 respectivamente). Sin embargo, debido a que los datos del 2016 no están actualizados para todos los países, no es posible obtener conclusiones. Por lo tanto, es crucial actualizar las bases de datos del 2016, para disponer de datos auténticos y confiables, que permita la toma de decisiones basada en evidencias.

**Tabla 1**

Clasificación de casos sospechosos de sarampión, rubéola y síndrome de rubéola congénita (SRC) para el período entre las semanas 01-14 2016
