On 7 August 2017, the Mexico Secretariat of Health reported 15 cumulative confirmed cases of congenital syndrome ... virus infection, one of which was stillborn. https://www.gob.mx/salud/documentos/desglose-de-casos-de-sindrome-congenito-

Deaths among Zika cases do not include deaths related to Guillain-Barré syndrome (GBS) or congenital malformations associated with Zika virus infection. As of 12 May 2016, previously reported deaths related to GBS were removed from this total.

Brazil Ministry of Health case definition for confirmed cases of congenital syndrome associated with Zika virus infection is based on laboratory evidence of Zika virus infection and detection of neural tube defects. As of EW 22 of 2017, 928 cases were confirmed for Zika virus by laboratory evidence. The three cases of congenital syndrome associated with Zika virus infection were notified to PAHO / WHO (EW 6 of 2016 to EW 21 of 2017). On 21 August 2017, the Antigua and Barbuda Ministry of Health case definition for confirmed cases of congenital syndrome associated with Zika virus infection was based on laboratory evidence of Zika virus infection in the mother and detection of neural tube defects. As of EW 17 of 2017, 3 cases were confirmed for Zika virus by laboratory evidence. In the previous Zika update from the Netherlands Ministry of Health, Welfare and Sport on 26 April 2017, a total of 2,589 confirmed cases were notified to PAHO / WHO (EW 1 of 2016 to EW 47 of 2016). On 10 July 2017, the Netherlands Ministry
