Tobacco control in the Americas: what has changed since 2005?

Rosa C. Sandoval

Regional Advisor, Tobacco Control, NMH/RF

**Pan American
Health
Organization**

**World Health
Organization**

REGIONAL OFFICE FOR THE Americas

In the 1990s

**Growing consensus on the need for
an international binding treaty
outside and within WHO**

“ (By the 90s), Propelled by a multinational industry driven by the extremely profitable nature of tobacco manufacture and trade and fostered by the addictiveness of nicotine, the (tobacco) epidemic spread rapidly from the developed to the developing world” [WHO]

***“The traditional public health methods (to be
control in the hands of health practitioners) for
reducing tobacco use were **no match for the
tobacco industry’s** power, transnational reach
and formidable resources. (...) it was time to
change the rules of the game.” [WHO]***

1999-2003 FCTC Negotiations by WHO Member States

*“The WHO FCTC is fundamentally flawed and will not achieve its objectives. The number of cultural, sectoral and geographic interests with a stake in the future of tobacco is diverse. Consequently an **agreed set of (nonregulatory) principles** freed from the constraints of the binding format proposed by the WHO represents **the only workable basis** for the worldwide development of policies.”*

Americas

What is the FCTC?

- 180 Parties in the world
- Legally binding. Ratification approved by Congress or equivalent.
- It constitutes a new approach in international health cooperation:
 - Traditional methods no match for the tobacco industry's power and transnational reach
 - Evidence-based strategies to decrease demand rather than only focusing on the supply.

FCTC - Mandates

http://www.who.int/fctc/text_download/en/

DEMAND

- **Art. 6.** Price and tax measures
- **Art. 8.** Effective legislation to protect people from exposure to tobacco smoke in indoor workplaces and public places
- **Art 9 and 10.** Regulation of contents of tob products and disclosure of contents/emissions

- **Art 20. Surveillance**
- **Art 21-22.** Reporting, Int. cooperation

OFICINA REGIONAL PARA LAS Américas

What has been accomplished by PAHO Member States since 2005?

**Ten years ago, very few countries
in the Region of the Americas had
effective policies on tobacco
control in place. Today...**

**Progress is significant but
...much, much more
remains to be done**

Implementation of a selected group of FCTC measures* in the Region of the Americas

**2005 80% had implemented
NONE of the six
measures**

Countries per number of measures implemented at the highest level

Technical note:

(*) Selected FCTC measures correspond to the MPOWER package of effective measures to reduce tobacco use (<http://www.who.int/tobacco/mpower/publications/en/>). For the purpose of the map, a country is considered to have implemented the respective measure when it has reached the highest level of achievement according to the criteria used in the WHO Report on the Global Tobacco Epidemic, 2013 (p. 82-97). The 2005 map does not evaluate the R measure and its source is the WHO Report on the Global Tobacco Epidemic, 2013-year that the highest level of achievement was reached (p. 179). The source for 2010 map is the WHO Report on the Global Tobacco Epidemic, 2011. The source for the 2015 map for M, O and R is the WHO Report on the Global Tobacco Epidemic, 2013 and for P, W and E is the PAHO/WHO Tobacco Control team.
