FIRST AUTOCHTHONOUS VECTOR-BORNE CASE

In epidemiological week (EW) 30 of 2016, the United Kingdom (U.K.) International Health Regulations (IHR) National Focal Point (NFP) notified PAHO/WHO of the detection of the first confirmed case of autochthonous vector-borne transmission of Zika virus in Turks and Caicos.

TREND

As of EW 48 of 2016, a cumulative total of 179 suspected and 17 laboratory-confirmed cases of vector-borne Zika virus have been reported in Turks and Caicos.¹ Weekly numbers of cases have progressively increased since EW 27 of 2016 reaching peaks in EW 42 and 43. In the last five weeks an average of five cases was detected per week.

¹ Reported to PAHO/WHO by the U.K. IHR NFP on 8 December 2016.

CIRCULATION OF OTHER ARBOVIRUSES

As of EW 40 of 2016, a total of 415 laboratory-confirmed dengue cases (incidence rate of 432 cases per 100,000 population) have been reported.² In 2015, 331 confirmed cases (662 cases per 100,000) were detected up to EW 52. In 2014, 252 confirmed cases (514 cases per 100,000) were identified up to EW 52.

As of EW 24 of 2016, 22 suspected chikungunya cases (43 cases per 100,000) were reported.³ By contrast, in 2014, 19 confirmed cases (40 cases per 100,000) were identified up to EW 44.

ZIKA VIRUS DISEASE IN PREGNANT WOMEN

As of EW 49 of 2016, no cases of Zika virus in pregnant women have been reported by Turks and Caicos health authorities.¹

ZIKA COMPLICATIONS

ZIKA-VIRUS-ASSOCIATED GUILLAIN-BARRE SYNDROME (GBS)

As of EW 49 of 2016, no cases of Zika-virus-associated Guillain-Barré syndrome (GBS) or other neurological syndromes have been reported by Turks and Caicos health authorities.¹

CONGENITAL SYNDROME ASSOCIATED WITH ZIKA VIRUS INFECTION

As of EW 49 of 2016, no cases of congenital syndrome associated with Zika virus infection have been reported by Turks and Caicos health authorities.¹

DEATHS AMONG ZIKA CASES

As of EW 49 of 2016, no deaths among Zika cases have been reported by Turks and Caicos health authorities.¹

NATIONAL ZIKA SURVEILLANCE GUIDELINES

No information is available on guidelines for Zika surveillance.

INFORMATION-SHARING

Information on the first confirmed case was shared by the United Kingdom IHR NFP with PAHO/WHO in EW 30 of 2016. At the time of this report, latest Zika update provided to PAHO/WHO from the Turks and Caicos Ministry of Health and Human Services was from EW 48 of 2016.
