**FIRST AUTOCHTHONOUS VECTOR-BORNE CASE**

In epidemiological week (EW) 30 of 2016, the Antigua and Barbuda International Health Regulations (IHR) National Focal Point (NFP) informed PAHO/WHO of the detection of the first confirmed case of local transmission of Zika virus disease.

**TREND**

Since the emergence of Zika in Antigua and Barbuda, a majority of the cases have been reported from EW 31 to EW 41 of 2016, with a peak in cases observed in EW 36. There has been a decreasing trend in cases since EW 38 (**Figure 1**).¹ No further information has been received since EW 47 of 2016.

**CIRCULATION OF OTHER ARBOVIRUSES**

As of EW 36 of 2016, a total of 37 probable cases (40 cases per 100,000 population) and three confirmed cases of dengue were reported in Antigua and Barbuda.²

¹ Reported to PAHO/WHO from the Antigua and Barbuda International Health Regulation (IHR) National Focal Point (NFP) on 25 November 2016.

ZIKA VIRUS DISEASE IN PREGNANT WOMEN

The first laboratory-confirmed case of Zika virus was in a pregnant woman at 31 weeks of gestation.

ZIKA COMPLICATIONS

ZIKA-VIRUS-ASSOCIATED GUILLAIN-BARRÉ SYNDROME (GBS)

As of EW 7 of 2017, no cases of Zika-virus-associated Guillain-Barré syndrome (GBS) or other neurological syndromes have been reported by Antigua and Barbuda health authorities.

CONGENITAL SYNDROME ASSOCIATED WITH ZIKA VIRUS INFECTION

As of EW 7 of 2017, no cases of congenital syndrome associated with Zika virus infection have been reported by Antigua and Barbuda health authorities.

DEATHS AMONG ZIKA CASES

As of EW 7 of 2017, no deaths among Zika cases have been reported by Antigua and Barbuda health authorities.

NATIONAL ZIKA SURVEILLANCE GUIDELINES

No information on guidelines for Zika surveillance is available.

LABORATORY CAPACITY

Samples from suspected Zika cases are sent to the Caribbean Public Health Agency (CARPHA) for laboratory molecular conformation (real time RT-PCR).

INFORMATION-SHARING

Information on the first confirmed case was shared by the Antigua and Barbuda IHR NFP with PAHO/WHO in EW 30 of 2016. At the time of this report, the latest information was shared by the Antigua and Barbuda IHR NFP on EW 47 of 2016.
