FIRST AUTOCHTHONOUS VECTOR-BORNE CASES

In epidemiological week (EW) 2 of 2016, the Ecuador International Health Regulations (IHR) National Focal Point (NFP) notified PAHO/WHO of the detection of the first autochthonous vector-borne transmission of Zika virus cases in a resident of the city of Guayaquil, Guayas and in a resident of Portoviejo, Manabi. The cases were laboratory confirmed at the National Institute of Public Health and Research (INSPI).

GEOGRAPHIC DISTRIBUTION

As of EW 41 of 2016, autochthonous cases have been laboratory-confirmed in 13 out of 24 provinces of Ecuador (Figure 2).¹

TREND

The number of reported Zika cases in Ecuador began to increase in EW 16 of 2016 and continued up until EW 25 of 2016 where a peak in cases was observed (Figure 1). Since EW 25 of 2016 there has been a decrease in cases. As of EW 41, Ecuador Ministry of Health reported 2,709 suspected and 805 confirmed cases of Zika.¹

CIRCULATION OF OTHER ARBOVIRUSES

Between EW 1 and EW 37 of 2016, a cumulative total of 12,902 dengue cases² and 2,167 chikungunya cases³ were reported. The number of cases of both dengue and chikungunya are lower than in 2015, during which a large outbreak had occurred (Figures 3 and 4).

**ZIKA VIRUS DISEASE IN PREGNANT WOMEN**

As of EW 41 of 2016, there were 218 confirmed cases of Zika virus disease were reported in pregnant women with the highest number of cases being confirmed from Manabi Province (168 cases). Of the total cases, 59 were infected in the first trimester of pregnancy, 102 in the second trimester, and 57 in the third trimester (Table 1).^1

**ZIKA COMPLICATIONS**

**ZIKA-VIRUS-ASSOCIATED GUILLAIN-BARRÉ SYNDROME (GBS)**

As of EW 41 of 2016, no cases of Guillain-Barré syndrome (GBS) associated with the Zika virus infection have been reported by Ecuador health authorities.

**CONGENITAL SYNDROME ASSOCIATED WITH ZIKA VIRUS INFECTION**

As of EW 41 of 2016, no cases of congenital syndrome associated with Zika virus infection have been reported by Ecuador health authorities.

**DEATHS AMONG ZIKA CASES**

As of EW 41 of 2016, no deaths among Zika cases have been reported by Ecuador health authorities.

**NATIONAL ZIKA SURVEILLANCE GUIDELINES**

The fourth edition of the Ecuador Zika national guidelines published on EW 9 of 2016 is available at:

**LABORATORY CAPACITY**

Laboratory confirmation is performed by the National Institute of Public Health and Research (INSPI) at the Ecuador Ministry of Public Health by molecular detection (real time RT-PCR) and serology (ELISA IgM detection).

**INFORMATION-SHARING**

Information on the first confirmed cases was shared by the Ecuador IHR NFP on EW 2 of 2016. At the time of this report, the latest epidemiological bulletin published by the Ecuador Ministry of Health was from EW 41 of 2016.
