Strategic Goal 3: Knowledge management and sharing

- **Academia & scientific community**: The academic and scientific communities contribute to research and producing new knowledge in health.

- **Knowledge architecture**: Knowledge management and sharing policies, processes, infrastructure, tools and skills strengthening as part of a learning organization framework.

- **Knowledge Processes**: Transparency and sound communication in an early stage can build trust in the system and facilitate contributions and cooperation across different sections of society. Communication and engagement with civil society and the public through mechanisms for active encouragement and transparent decision-making process.

- **Strategic communications**: Knowledge management methodologies and mechanisms to improve decision-making, capture, share and measure organizational knowledge.

- **Social participation**: Strategic tools and methodologies for supported decision-making. Public health communication strategy on national priority issues, as well as promoting (individual, social, and political) changes that lead to achievement and maintenance of health.

- **Networks**: Different types of networks implemented, such as: strategic and diplomatic networks of relations, thematic and knowledge networks, and social networks for community engagement.
