

### Number of confirmed measles cases by epidemiological week and country. Region of the Americas, 2023-2026\*

Source: Immunization Data Warehouse and surveillance reports sent to PAHO. For United States: Measles Cases and Outbreaks, CDC website: <https://www.cdc.gov/measles/cases-outbreaks.html>. \*Data as of epidemiological week 22, 2026. The epi curve goes up to EW 21, to mitigate underreporting from the last week.

**Table.1**  
Classification of Suspect Measles, Rubella, and Congenital Rubella Syndrome (CRS) Cases for Week 1-22, 2026

Subregion and Country	Susp. Cases 2026	Measles Confirmed 2026				Year/Week Last Conf. Measles case	Rubella Confirmed 2026			Year/Week Last Conf. Rubella Case	Diagnosis of Discarded Cases 2026		Congenital Rubella Syndrome			Year/Week Last Conf. CRS Case

\*Congenital Rubella Infection.

...No updated report received; NR-not reporting

(A) Number of suspected and confirmed cases were based on provisional aggregate data.

(B) Includes the probable cases reported by Canada under the clinically confirmed column, due to alignment with PAHO's case definition. Click here (<https://health-infobase.canada.ca/measles-rubella/#:~:text=While%20all%20confirmed,all%20provinces/territories>) for more details regarding probable cases reporting in Canada.

(C) Measles Cases and Outbreaks, CDC website at: <https://www.cdc.gov/measles/cases-outbreaks.html> (Data reported on 14 Jun 2026). For 126 confirmed cases, the criteria for measles case confirmation are not available given that is aggregate data.

**NOTE:** PAHO currently is continuously monitoring measles outbreaks through its Incident Management Support Team (IMST) and issues biweekly situation reports with the most recent available data from other sources such as IHR reporting system or national SITREPs. However, the data in the Measles/Rubella bi-Weekly Bulletins may not fully match the publication date due to a standard reporting delay of about one week in the surveillance system.
