HPV-related cancer

Regional Revolving Funds

The Regional Revolving Funds of PAHO support the countries of the Americas in these three areas. Through timely access to safe and quality vaccines, they help prevent HPV infections and associated cancers. They also facilitate access to technologies and supplies for early screening and diagnosis, including molecular HPV detection tests, as well as technologies and supplies for treating precancerous lesions and cervical cancer, strengthening health systems' capacity to provide timely care and save lives.

By enhancing access to vaccines, screening tests, treatment medications, and supportive care, as well as treatment technologies, the RRFs support countries on the path toward the elimination of cervical cancer by 2030.

Through molecular HPV detection tests, technologies, medications (including supportive ones), and supplies for the treatment of precancerous lesions and cervical cancer, which are the latest additions to the RRF portfolio, they offer an affordable and long-term solution to increase screening coverage.

THE OFFER OF THE **Regional Revolving Funds**

 AREA	 PREVENTION	 DIAGNOSTICS	 TREATMENT	 EQUIPMENT
HPV-RELATED CANCER	✓ HPV Vaccine: Bivalent Quadrivalent Nonavalent	✓ HPV diagnostic kits	✓ Antineoplastics: Carboplatine Cisplatin — Paclitaxel — Pembrolizumab ✓ Pain management medicines: Fentanil Morphine ✓ Corticosteroids: Prednisolone Dexametasone	✓ Colposcope + Portable Thermocoagulator ✓ Thermocoagulation equipment ✓ Videocolposcopes ✓ Electrosurgical generator

✓ Available with current agreements with the RRF

— The delivery times are extended because there are no current agreements with suppliers.

DIAGNOSTICS

High processing volume

Medium to low processing

ABBOTT		ROCHE	CEPHEID
			
PRICE PER TEST	10.68 USD = 9.18 USD (Test) + 1.50 USD (collection kit)	13.40 USD (test + collection kit)	17.85 USD = 14.90 USD (test) + 0.45 USD (brushes) + 2.50 USD (preservative solution)
PRICE PER TEST (SELF-COLLECTION)	12.07 USD = 9.18 USD (test) + 2.89 USD (self-collection kit)		-
FREIGHT	To be quoted separately	2.00 USD por test	To be quoted separately
MINIMUM PURCHASE AMOUNT	25,000 tests per instrument per year, minimum duration of 2 years	25,000 tests per instrument per year, minimum duration of 2 years	-
INSTRUMENT	Alinity M	Cobas 5800	GeneXpert – to be acquired separately

Installation, training, preventive and corrective maintenance included.

Access to the equipment is free of charge.

Videocolposcopes

4000 USD
Reference price

-

Colposcopes + Thermocoagulator

2500 USD
Reference price

Estimated delivery time: 6 weeks after the purchase order is placed

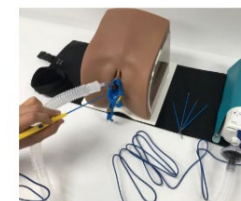

Thermocoagulator

948 USD
Reference price

Estimated delivery time: 6-8 weeks after the purchase order is placed

Electrosurgical Generator

1995 USD
Reference price

Estimated delivery time: 6-8 weeks after the purchase order is placed

The Regional Revolving Funds are technical cooperation mechanisms that promote better access to and availability of vaccines, health supplies and medicines. Through the regional consolidation of demand from PAHO Member States, procurement mechanisms and strategic alliances are established to achieve better prices and agreements for all countries.

They also support countries in the standardization of protocols, quantification through systems such as QuantMET, rational use of products, strengthening supply management, among others.
