

PLANNING AND NATIONAL DOCUMENTS

Of the **35** countries
in the Americas:

35 countries recognize the
importance of health in
national climate change
commitments

18

countries have
conducted health
vulnerability and
adaptation (V&A)
assessments

8

countries have
health V&A
assessments under
development

6

countries are
currently **developing**
HNAPs

But only...

15

countries **have developed**
health national adaptation
plans (HNAPs)

Learn more about
the impact of climate
change on health.
