*Congenital Rubella Infection. …No updated report received; NR-not reporting
(A) Number of suspected and confirmed cases were based on provisional aggregate data.
(B)Includes the probable cases reported by Canada under the clinically confirmed column, due to alignment with PAHO's case definition. Click here (https://health-infobase.canada.ca/measles-rubella/#:~:text=While%20all%20confirmed,all%20provinces/territories) for more details regarding probable cases reporting in Canada.
(C) Measles Cases and Outbreaks, CDC website at: https://www.cdc.gov/measles/cases-outbreaks.html (Data reported on 12 November 2026).
(D) The total number of confirmed cases includes 572 cases for which confirmation criteria were not available.

NOTE: *PAHO currently is continuously monitoring measles outbreaks through its Incident Management Support Team (IMST) and issues biweekly situation reports with the most recent available data from other sources such as IHR reporting system or national SITREPs. However, the data in the Measles/Rubella bi-Weekly Bulletins may not fully match the publication date due to a standard reporting delay of about one week in the surveillance system.*
