Design and administration of cigarette taxes

Are taxes applied in mixed fashion (<i>ad valorem</i> and excise)?	No
If a mixed tax system is used, is the tax burden of excise taxes greater than that of <i>ad valorem</i> taxes? ⁷	---
If an <i>ad valorem</i> or mixed tax system exists, is a specific minimum tax applied? ⁸	---

- The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
- Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
- Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
- Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
- Ad valorem* tax: is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
- The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
- Specific excise taxes tend to raise consumer prices more, relatively, than *ad valorem* taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
- If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

	2008	2010	2012	2014	2016 ⁹
Tax (percentage of the final price of the most sold brand)	43.88%	51.18%	46.06%	42.94%	44.48%
Price of the most sold brand (international dollars)	9.26	11.14	11.67	12.55	14.30

⁹ The country has increased excise taxes on tobacco since 2014; however, due to price variability, this does not necessarily have an effect on the tax indicator.

EVOLUTION OF THE PRICE OF CIGARETTES COMPARED TO INCOME

	2008	2010	2012	2014	2016
Percentage of per capita GDP required to purchase 100 packs ¹⁰	11.04%	13.79%	13.91%	14.52%	16.02%

Have cigarettes become less affordable since 2008? Yes

Did cigarettes become less affordable between 2014 and 2016? Yes

¹⁰ Note that a higher percentage means it is less affordable, which discourages cigarette smoking.

Percentage of GDP per capita required to purchase 100 packs

SUPPLEMENTARY INFORMATION ON TAXES

Are tax stamps or bar codes required for tobacco products?	No
Are duty-free sales banned or limited?	Limited
Is tobacco tax revenue pre-allocated to a specific purpose or activity?	According to the National Health Fund Act of 2003, 5% of excise taxes (including on tobacco products) are allocated to the National Health Fund. According to the 2008/2009 Revenue Measure (documented in Ministerial Paper No. 23), the percentage of tobacco excise taxes allocated to the National Health Fund was increased to 20%.
