MONITORING OF THE RESOLUTIONS AND MANDATES OF THE PAN AMERICAN HEALTH ORGANIZATION

Introduction

1. In 2016, a detailed assessment of the resolutions adopted by the Pan American Health Organization (PAHO) over a period of 17 years (1999-2015) was presented to the 55th Directing Council of PAHO (1). Following the presentation of said report, the Directing Council adopted Resolution CD55.R11 (2), which mandated that the Pan American Sanitary Bureau (PASB) present an analysis on the status and implementation of the resolutions and mandates adopted by the Governing Bodies of PAHO at least every three years.

2. This report is presented pursuant to Resolution CD55.R11 and provides an updated analysis on the status and implementation of the resolutions and mandates of PAHO. Building on previous assessments presented to the Governing Bodies of PAHO in 2016 and 2019 (1, 3), the present report encompasses the resolutions classified as Active and Conditional Active for the period 1999-2018 and incorporates the resolutions adopted by PAHO over the period 2019-2021.

Analysis of PAHO Resolutions (1999-2021)

3. For the purpose of this analysis, an interprogrammatic working group, comprised of representatives from the offices of the Deputy Director, Assistant Director, and Director of Administration was established. The working group drew on previous assessments presented to the Governing Bodies and on the experience of the members of the prior working group.

Methodology

4. To ensure consistency in the analysis, the methodology was based on the approach previously developed and applied for prior assessments submitted to the Governing Bodies

* This version contains minor editorial adjustments in the Annex.

in 2016 and 2019 and includes adaptations to align with the Strategic Plan of the Pan American Health Organization 2020-2025 (4). The methodology consisted of the following steps:

- a) Determine the period of analysis of resolutions (1999-2021).
- b) Use the previously established criteria for determining whether a resolution can be classified as Active, Conditional Active, or Sunset (Table 1).

Table 1. Criteria for Determining the Classification of Resolutions

ACTIVE	CONDITIONAL ACTIVE	SUNSET
All resolutions whose stipulated lifespan remains in effect	All resolutions whose lifespan has ended, but it is unknown whether compliance with some commitment is pending due to a lack of information at the time of the study or for some other reason	All resolutions that by their very nature do not require subsequent monitoring (e.g., the election of the members of a committee, subcommittee, working group, etc.; approval of the scale of quota assessments; approval of the Director's salary; or modifications to the Staff Rules or Financial Rules and Regulations)
All resolutions whose commitments have not been met or renewed in a subsequent resolution and whose continuity is deemed important	All resolutions that are no longer relevant, even though some of their commitments have not been met	All resolutions whose lifespan has ended ¹ and/or whose commitments are considered to have been met ² or have been revisited in a subsequent resolution
		All resolutions whose lifespan has not been stipulated but the conditions that gave rise to them are considered to have changed, making them irrelevant ³
		All resolutions that have been superseded by another more recent one

- c) Align the structure of this report with the Strategic Plan of the Pan American Health Organization 2020-2025 (4) (see Annex A).

¹ When the resolution or the document endorsed or approved by the resolution clearly stipulates the lifespan, that information should be included in the analytical section of the resolution.

² The working group shall review all operative paragraphs in each resolution and determine whether each commitment made by the Member States and PASB has been met, whether there is no information at the time of the study, or whether the commitment remains in force.

³ For the purposes of this study, a resolution is considered to be relevant if it meets one or more of the following criteria: *a)* the subject is included in the PAHO Strategic Plan 2020-2025; *b)* the preamble section of the resolution is still valid; *c)* it is explicitly related to the global mandates of an international organization of importance to PAHO; or *d)* it calls for PAHO technical cooperation at the regional level.

- d) Analyze the resolutions in the updated document of mandates according to the following aspects:
 - i. *Lifespan*: Whether the resolution or document endorsed by the resolution explicitly includes time-marked information.
 - ii. *Replacement*: Whether the resolution was superseded by another more recent one, in which case the one that superseded it shall be noted.
 - iii. *Compliance with mandates*: Whether each commitment established for PASB and the Member States has been met or whether the mandate remains in force. If information was unavailable at the time of the study, this fact shall be stated in the report.
 - iv. *Progress reports*: Whether the resolution or the document endorsed by the resolution stipulates the periodicity with which progress reports must be submitted. If so, it shall be determined whether the reports were submitted as stipulated.
- e) Issue a recommendation for each resolution pursuant to its findings.
- f) Submit a report on the status of resolutions to the 30th Pan American Sanitary Conference of PAHO in September 2022.

5. In previous assessments, the resolutions were organized by category, following the structure of the Strategic Plan of the Pan American Health Organization 2014-2019 (Amended) (5). Given the change in programmatic structure between the Strategic Plan 2014-2019 and the Strategic Plan 2020-2025, the resolutions were classified according to grouped thematic areas related to the 28 outcomes (OCMs) of the Strategic Plan 2020-2025 and reviewed from the oldest to the newest. The thematic areas align with the grouping presented in the End-of-biennium Assessment of the PAHO Program Budget 2020-2021/First Interim Report on the Implementation of the PAHO Strategic Plan 2020-2025 (Document CE170/13) (6). The thematic areas and related OCMs include:

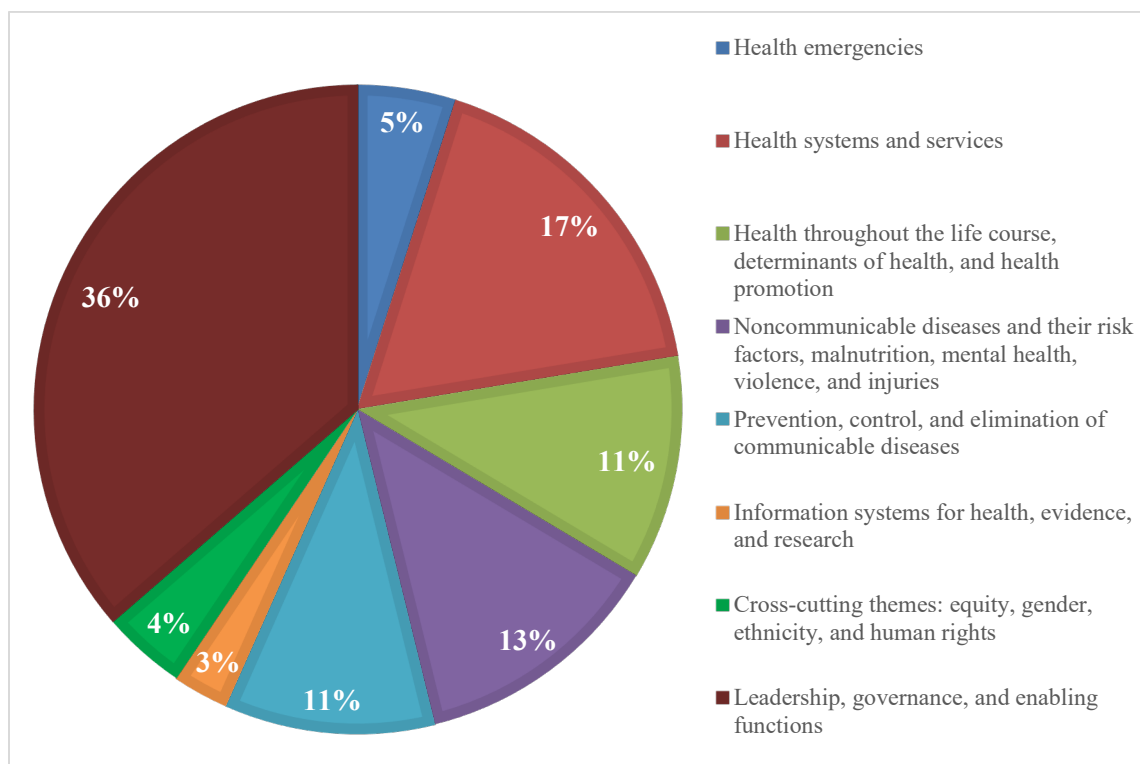

- a) Health emergencies (OCMs 23-25)
- b) Health systems and services (OCMs 1, 7-11)
- c) Health throughout the life course, determinants of health, and health promotion (OCMs 2, 3, 18, and 19)
- d) Noncommunicable diseases and their risk factors, malnutrition, mental health, violence, and injuries (OCMs 5, 6, 13-16)
- e) Prevention, control, and elimination of communicable diseases (OCMs 4, 12, and 17)
- f) Information systems for health, evidence, and research (OCMs 20-22)
- g) Cross-cutting themes: equity, gender, ethnicity, and human rights (OCM 26)
- h) Leadership, governance, and enabling functions (OCMs 27 and 28)

6. The resolutions that were determined to be sunset by the 57th Directing Council were removed, and those resolutions adopted in the last three cycles of Governing Body meetings were included. The document also includes updated information related to progress, midterm, and final reports presented during 2019-2021.

Results

7. During the period 1999-2021, 363 resolutions were adopted by the Governing Bodies, 220 of which were sunset by the 55th Directing Council and 57th Directing Council and are therefore not included in this report. The remaining 143 resolutions were categorized by relevant thematic area (Figure 1). Leadership, governance, and enabling functions had the largest number of resolutions (52, or 36%), mainly because of the long-standing nature of the resolutions in this area.

Figure 1. Percentage of PAHO Resolutions, by Thematic Area

8. Following the defined methodology, the working group proposes to classify 74 resolutions as Active (52%), 17 as Conditional Active (12%), and 52 as Sunset (36%) (see Table 2). A summary of the resolutions by thematic area, including their number, title, year of adoption and finalization, type of document, reporting requirement, and progress reports presented to the Governing Bodies is available in the Annex. For each resolution, a recommendation on the status is presented for consideration by the Governing Bodies.

Table 2. Results of the Analysis, by Thematic Area				
Thematic Area and related OCM(s)	Active	Conditional Active	Sunset	Number of resolutions
Health emergencies (OCMs 23-25)	2	1	4	7
Health systems and services (OCMs 1, 7-11)	12	5	8	25
Health throughout the life course, determinants of health, and health promotion (OCMs 2, 3, 18, and 19)	4	2	10	16
Noncommunicable diseases and their risk factors, malnutrition, mental health, violence, and injuries (OCMs 5, 6, 13-16)	7	5	6	18
Prevention, control, and elimination of communicable diseases (OCMs 4, 12, and 17)	8	0	7	15
Information systems for health, evidence, and research (OCMs 20-22)	4	0	0	4
Cross-cutting themes: equity, gender, ethnicity, and human rights (OCM 26)	5	0	1	6
Leadership, governance, and enabling functions (OCMs 27 and 28)	32	4	16	52
TOTAL	74	17	52	143

Conclusions

9. The working group found some limitations in determining compliance with the mandates, especially in the case of older resolutions that lacked information on reporting requirements. Discrepancies around categorizing some of the resolutions were also noted, in part due to difficulties in standardizing and harmonizing the language. Although there has been a notable improvement in the harmonization of documents and resolutions in recent years, a number of resolutions will require further review to determine whether and when a report will be presented. It is imperative that future resolutions include specific reporting requirements, clear mandates, and capacity for implementation. It is also recommended that PASB continue monitoring resolutions on a regular basis in order to follow up on compliance with the mandates and present reports to the Governing Bodies every three years.

Action by the Executive Committee

10. The Executive Committee is invited to take note of this report and provide any comments it deems pertinent.
