

THE RELATIONSHIP BETWEEN HOUSING SECURITY AND HEALTH: IMPLICATIONS FOR HEALTH EQUITY

Dr. Elizabeth Bowen, University at Buffalo School of Social Work
 Meghan Holtan, University at Buffalo School of Architecture and Planning

1

Pathways between housing security and health

-  **1. Physical quality and condition**
-  **2. Residential stability**
-  **3. Housing affordability**
-  **4. Area context**
-  **5. Care and connection**

(Swope and Hernández 2019; Taylor 2018; Holtan, Bowen, Maisel and Riva forthcoming)

2

1. Physical condition and quality

3

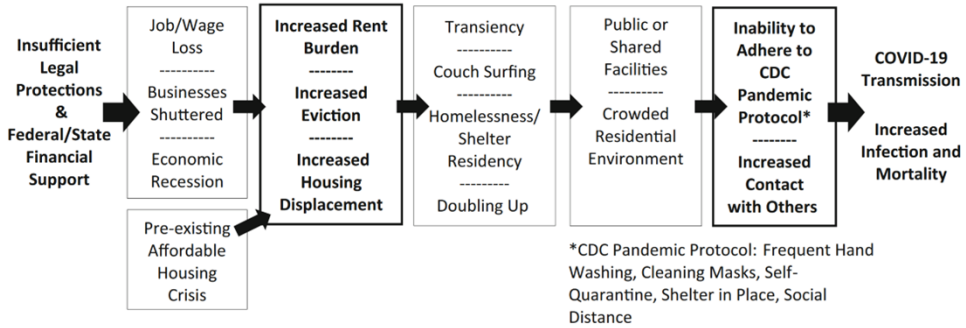

2. Residential stability: Lessons from COVID-19 era housing policy

- Residential stability: foreclosure, frequent moves, houselessness, voluntary and forced migration and displacement
- Residential crowding
 - Accounts for some of the age disparities in low-income countries [4]
 - Drives excess mortality in Chilean municipalities [5]
- Incidence and mortality increase after eviction moratoriums are lifted in the U.S. [6]

4

2. Residential stability: Lessons from COVID-19 era housing policy

Benfer, E. A., Vlahov, D., Long, M. Y., Walker-Wells, E., Pottenger, J. L., Gonsalves, G., & Keene, D. A. (2021). Eviction, health inequity, and the spread of COVID-19: Housing policy as a primary pandemic mitigation strategy. *Journal of Urban Health*, 98(1), 1–12. <https://doi.org/10.1007/s11524-020-00502-1>

6

6

2. Residential stability: Fairbanks, Alaska Housing First

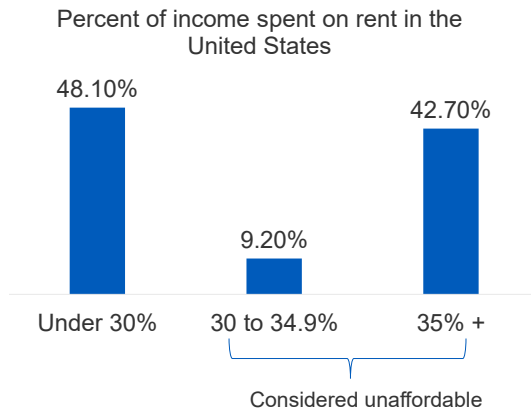

Item	Baseline	18 months
Drinking daily	51%	31%
Emergency room visits	60.9%	42.9%
Average cost to community per tenant of emergency services	\$4,175	\$1,749
Average health costs per tenant, per year	\$25,763	\$14,321

“My stress level done went down ‘cause I know I got a place to come and be safe, be warm.” – Tenant [7]

7

3. Housing affordability

High rents and housing costs leave less money for other things that benefit health:

- Food
- Transportation
- Heating
- Health care
- Education
- Hobbies
- Taking care of others

U.S. Census Bureau, 2022 ACS 1-Year Estimates

8

4. Neighborhood and area context

Baltimore, Maryland, USA

Medellin, Colombia

Anchorage, Alaska, USA

9

5. Care and connection in housing

- **Design:** Treatment of common areas in multifamily developments [8]
- **Policies:** Age-restricted housing developments not always great for caregiving relationships [9]
- **Programs:** Importance of case management in housing for people exiting homelessness [10]

11

Intersections across pathways perpetuate inequities

The cyclical relationship between housing unaffordability, housing insecurity, health consequences, and healthcare costs [13]

12

Toward the Goal of Health Equity

- **Health equity** is the idea that all people have the opportunity to be as healthy as they can possibly be, and to define what health looks like for them [14]
- This is not possible without access to housing that is safe, stable, and affordable!
- Global policy implications:
 - The right to housing
 - Trauma-informed care and design
 - Co-design

Artwork from the National Museum of Mexican Art in Chicago, displayed in Fall 2021

13

13

Global Policy Implications: The Right to Housing

- How can we advocate for policy change at local, state, national, and international levels to protect **housing as a human right**?
- Example legislation – Canada’s 2019 National Housing Strategy Act [15]
 - Acknowledges housing as a human right
 - Requires Canadian federal government to develop and implement a national housing strategy, with emphasis on inclusion of people with living experience of housing challenges

Global Policy Implications: Trauma-Informed Care and Design

- Policy must also recognize the trauma and powerlessness of homelessness and housing insecurity [16]
- A **trauma-informed approach** in policies, programs, and design is essential: [17]
 - Safety
 - Collaboration
 - Trust and transparency
 - Choice
 - Empowerment
 - Intersectionality

University at Buffalo [Institute on Trauma and Trauma-Informed Care](#)

16

16

Global Policy Implications: Co-Design

- Example: Sekuwe (My House) collaboration between two Dene First Nations communities and University of Manitoba [18]
- Developed in response to health crisis including elevated TB due to overcrowded, poorly ventilated housing
- **Co-designed housing** incorporating Dene design elements:
 - Use of local materials
 - Public and private spaces for traditional activities
 - Energy independence
 - Traditional food production and storage
 - Long-term maintenance and repair

17

17

Conclusion

- Research on the pathways between housing and health is extensive and ever-growing
- Addressing housing inequities is essential to making health equity a reality
- Policy change promoting the right to housing and trauma-informed and co-designed programs and services can be a part of the solution
- Different communities will have different solutions. We have much to learn from each other.
